INTERNAL RISK FACTORS

Risks relating to our Company and its Business

- 1. Our company is involved in certain legal proceedings and any adverse outcome of any proceedings being unsuccessful, it may have an adverse effect on the performance of the Company.***

Our Company is involved in certain legal proceedings, including civil suits, consumer cases and tax disputes which typically arise in the normal course of business. These legal proceedings are pending at various levels of adjudication before various courts/ forum, regulatory authorities and tribunals. Our Company has been incurring cost in defending these proceedings. Any adverse orders in these proceedings may have an impact on our financial condition. For the details, please refer to chapter titled “**Pending Proceedings and Statutory Defaults**” beginning on page 173 of our Prospectus.

- 2. Our Company's promoter directors are promoter directors of a group company, whose liabilities to some of its creditors are in default. Any adverse action taken by these creditors might affect the financial condition of our promoter directors.***

The promoter directors of our Company are also Promoter Directors in Sakthi Sugars Limited (SSL), one of the group companies listed in BSE and NSE. SSL has as on September 30, 2019 loan outstanding to the Banks / FI / Asset Reconstruction Companies aggregating to ₹ 64,304 lakh (Principal) and ₹ 46,138 lakh (Interest). The loans are secured, *inter alia*, by personal guarantees of the Promoter Directors of our Company.

In the past, separate applications were filed by Devendran Coal Private Limited, Jain Irrigation Systems Limited, Bank of India and Punjab National Bank before Hon'ble NCLT, Chennai Bench for admission of SSL into Insolvency and Bankruptcy Code 2016. All these applications stand withdrawn as on date by the Creditors on account of compromise entered into. Any default in the compromise settlements may lead to these Creditors initiating action against SSL.

- 3. *Our Company's promoter directors are promoters of Group Company in which two of their creditors have filed petitions before the Debt Recovery Tribunal ("DRT") for recovery of their dues. Any adverse outcome on any of the applications before DRT for recovery of dues may have an impact on the financials of our promoter directors.***

O.A.No. 9/2018 has been filed before DRT, Chennai by IFCI Limited acting as an agent of Sugar Development Fund ("SDF") in respect of SDF Loans claiming a sum of ₹ 6,806.80 lakhs from SSL. SSL has filed a written statement and is contesting the same. SSL has stated that representations have been made by the Tamil Nadu Sugar Mills Association to Government of India, of which it is a member, seeking relief and withdrawal of legal proceedings, explaining the various factors which have affected the sugar industry in Tamil Nadu.

ARCIL, a defendant in the above O.A. No. 9/2018, has filed an Attachment Before Judgment Application for SSL's shareholding in Sakthi Auto Component Limited. Management of SSL has agreed with ARCIL for creation of pledge.

O.A.No. 414/2018 has been filed by Punjab National Bank (PNB) before DRT, Coimbatore, claiming a sum of ₹ 5,751.13 lakh. SSL has requested for restructuring and withdrawal of proceedings. This has been accepted by the PNB and PNB has instructed its counsel by e-mail dated September 07, 2018 to withdraw the application.

Any adverse outcome on the above said petitions would have an impact on the financials of SSL and on the Promoter Directors of our Company.

- 4. *One of our group companies has defaulted in payment to the bond holders of the Foreign Currency Convertible Bonds ("FCCB"). The Bondholders and the Trustee to the Bondholders have filed a winding up petition before the Hon'ble High Court of Madras. In the event of the petitions getting admitted against the group company, it might have an impact on the financials of our promoter directors, which in turn, may have an impact on our company.***

SSL has issued Foreign Currency Convertible Bonds in two tranches, aggregating US\$ 60 million comprising US\$ 20 million in Series A Bonds and US\$ 40 million in Series B Bonds. Series A Bonds have been fully settled except for unclaimed bonds.

Bondholders holding US\$ 1 million FCCBs under Series B had initially filed Company Petitions in C.P.No.19 of 2012 and C.P. No.212 of 2012 before the Hon'ble High Court of Madras for winding up of the Company on the ground that the Company is unable to pay its debts, which petition is yet to be admitted by the Hon'ble High Court. There was a compromise reached with the petitioning bondholders for payment of the principal sum due together with future interest thereon.

In C.P. No.19/2012 filed by a FCCB holder of the company before the Hon'ble High Court of Madras, consent order has been passed for payment of US\$ 1,167,900 with interest at 8.5% p.a. from January 31, 2017 subject to approval of RBI. RBI has granted its approval on August 07, 2017 and the Company has informed that it has so far paid US\$ 700,000 and is taking efforts to pay the balance. This petitioner has also filed a petition in the NCLT, Chennai which has ended with compromise for settlement. In the event of SSL, not honouring the commitment as per the compromise settlement as agreed to, the FCCB holder shall proceed with action against SSL.

In C.P.No.212/2012 filed by a FCCB holder of the company, a compromise was reached with the holder for payment of US\$ 778,000 with interest @ 8.5% p.a. from February 01, 2017 and consent order has been passed by the Hon'ble High Court of Madras on January 30, 2019 directing the Company to apply for permission of RBI and subject to receiving consent from RBI, make payment thereof. The bond holder has approached NCLT with a petition, admission of which is being contested by SSL. In the event NCLT admits the petition, this will have an adverse impact on SSL.

5. Two of our promoter Group companies have defaulted in payment of interest and principal dues to some of its creditors. Any adverse action taken by them could affect the financial position of our promoters and the company.

The promoter directors of our Company are also Promoter Directors in Shri Chamundeswari Sugars Limited, one of the group companies which has repaid the loan outstanding to the Banks and Financial Institutions. However, as at September 30, 2019, there are defaults to IREDA, Sugar Development Fund and Government of Karnataka Interest Free Purchase Tax Loans. The loans are secured, *inter alia*, by personal guarantees of the Promoter Directors of our Company. However, GOI had announced a restructuring proposal vide notification No. GSR885 (E) dated 17.9.2018 for SDF loans. The company has submitted a restructuring proposal to SDF/IFCI /and the Sugar Development Fund (SDF).

In the event of restructuring proposal not being reached and failure of Shri Chamundeswari Sugars Limited, to clear the dues to the above lenders banks and institutions, the lenders might initiate legal course of action for recovery, which will have an impact on the financial position of the promoter directors and the Company.

One of our promoter group companies, ABT Investments (India) Private Limited (ABTII) has issued senior secured redeemable non-convertible debentures aggregating ₹ 100 crore on private placement basis to Edelweiss Group on August 29, 2016 redeemable in two years in 4 tranches. The last tranche had fallen due on August 31, 2018. These debentures are secured, by way of mortgage of certain immovable properties of ABTII and pledge of 5.94 crore equity shares of Sakthi Sugars Limited held by ABTII (promoters of Sakthi Sugars Limited).

ABTII has defaulted in servicing of interest since November 30, 2017 and the principal amount of debenture has also not been redeemed on the respective due dates. The debenture holders have, invoked the pledge of shares through the debenture trustee and it is reported that the trustee has sold 9.90 lakh of the equity shares of Sakthi Sugars Limited held by ABTII.

In case of ABTII not clearing the dues, the secured creditors would continue the sale of the shares of SSL pledged to them, as also take any other legal recourse for the recovery of their dues. This will have an adverse impact on the financial position of our promoter directors.

6. One of our promoter Directors have furnished personal guarantees for loans availed by two associate companies, which have defaulted in repayment of the loans. Any adverse action by the creditors will have an impact on our promoter director.

One of our promoter directors, Dr. M. Manickam, has furnished Personal Guarantees for loans availed by two of our associate companies viz. ABT (Madras) Private Ltd and Sakthi Global Auto Holdings Ltd, U.K. The companies have defaulted in their debt obligations and action has been initiated by the creditors in NCLT, Chennai and arbitration in Singapore jurisdiction respectively. Any adverse action against the Personal Guarantor by the creditors will have an impact on the financial position of Dr. M. Manickam. (For details, Refer “**Legal and Other information**” at page 173).

7. We have been subject to RBI inspection and any adverse findings may affect our business and operations.

Our Company was subjected to RBI’s inspection under Section 45N of the RBI Act, 1934 for the financial position as on March 31, 2019.

Based on the supervisory inspection for the year ended March 31, 2017, our company received a Show Cause Notice (SCN), under Section 58(G) of RBI Act 1934 vide letter DNBS (Che) 258/13.18.028/2018-19 dated August 31, 2018 proposing to impose penalty for violation of Fair Practices Code (FPC) Guidelines. Our Company represented the matter to the Committee of Executive Directors, which has subsequent to a personal hearing, decided not to impose any penalty in this regard. While our company takes utmost care to comply with regulatory requirements of RBI, we cannot assure that the RBI or any other regulatory authority will not make similar or additional observations in future or that we will be able to respond to all such queries to the satisfaction of the RBI or such other authorities.

8. *We have contingent liabilities; in the event these contingent liabilities materialize, our financial condition may be adversely affected.*

For the period ended December 31, 2019, we had contingent liabilities not provided for, amounting to (i) ₹ 9.83 lakh towards Income Tax issues are pending before the Assessing Officer of Income Tax, Coimbatore and (ii) ₹ 1,328.29 lakh towards Service Tax which has been demanded by the Central Excise Authorities. The writ petition filed by our company before the Hon'ble High Court of Madras against the levy has been admitted and stay has been granted. The company has deposited with the Department, an amount of ₹ 98.63 lakh against the demand relating to payment under protest. In the event that these contingent liabilities materialize, our financial condition may be adversely affected.

9. *Our financial performance is highly sensitive to interest rate volatility, which could impact our net interest income to decline and adversely affect our return on assets and profitability.*

Our results of operations are substantially dependent upon the level of our net interest margins. A significant component of our income is derived from hire purchase finance operations, which comprise more than 90% of our total revenue for FY 2019, 2018 and 2017.

We borrow funds on both fixed and floating rates. A majority of our liabilities, such as our secured / unsecured redeemable non-convertible debentures, subordinated debt, fixed deposits and term loan from financial institutions carry fixed rates of interest and the remaining borrowings from banks are linked to the respective bank's benchmark Marginal Cost based Lending Rate / base rates. As on December 31, 2019, around 87% of our total borrowings were at fixed rates of interest. We are exposed to interest rate risks as a result of lending to customers predominantly at fixed interest rates and, in amounts and for periods which may differ from our funding sources. Volatility in interest rates can materially and adversely affect our financial performance and cash flows. In a rising interest rate environment, if the yield on our interest-earning assets does not increase correspondingly with or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted.

Accordingly, our operations are vulnerable to fluctuations in interest rates. Interest rates are highly volatile and fluctuations thereof are dependent upon many factors which are beyond our control, including the monetary policies of RBI, de-regulation of the financial services sector in India, domestic and international economic and political conditions, inflation and other factors. Rise in inflation, and consequent changes in bank rates, repo rates and reverse repo rates by the RBI has led to an increase in interest rates on loans provided by banks and financial institutions, and market interest rates in India have been volatile in recent periods.

There can be no assurance that we will be able to adequately manage our interest rate risk. If we are unable to address the interest rate risk, it could have an adverse effect on our net interest margin, thereby affecting our business and financial condition.

10. *Our business requires raising substantial funds by the way of borrowing, and any disruption in funding sources would have a material adverse effect on our liquidity, financial position and/or cash flows.*

As an asset finance company, our liquidity and on-going profitability, in large part, depend upon our timely access to, and the costs associated with, raising of funds. Our funding requirements historically have been met from a combination of loans from banks and financial institutions, issuance of secured redeemable non-convertible debentures to public / on private placement basis, public deposits and the issue of subordinated debt. Thus, our business depends and will continue to depend on our ability to access diversified funding sources. Our ability to raise funds on acceptable terms and at competitive rates continue to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India, developments in the international markets affecting the Indian economy, investors and/or lenders perception of demand for debt and equity securities of NBFCs and our current and future results of operations and financial condition.

The RBI in its Master Direction- Non-Banking Financial Company-Systemically Important Non-Deposit-Taking Company and Deposit-Taking Company (Reserve Bank) Directions, 2016 vide DNBR.PD.008/03.10.119/2016-17 September 01, 2016 (updated as on February 17, 2020) issued certain guidelines with respect to raising money through private placement by NBFCs in the form of non-convertible debentures (Refer Annexure XXI- Guidelines on Private Placement of NCDs (maturity of more than 1 year) by NBFCs).

These guidelines include restrictions on the minimum subscription amount for a single investor at ₹ 20,000, the issuance of private placement of NCDs shall be in two separate categories, those with a maximum subscription of less than ₹ 1 crore and those with a minimum subscription of ₹ 1 crore and above, the restriction of number of investors in an issue to 200 investors for a maximum subscription of less than ₹ 1 crore which shall be fully secured, there is no limit on the number of subscribers in respect of issuances with a minimum subscription of ₹ 1 crore and above while the option to create security in favour of such subscribers will be with the issuers and such unsecured debentures shall not be treated as public deposits, restriction on NBFCs for issuing debentures only for deployment of funds on its own balance sheet, etc. This has resulted in limiting the Company's ability to raise fresh debentures on private placement basis.

As on December 31, 2019, out of the total outstanding non-convertible debentures of ₹36,228.77 lakh, ₹13,040.00 lakh is from privately placed non-convertible debentures. The privately placed NCDs form around 12.92% of the total outstanding debt of ₹ 100,900.84 lakh as on December 31, 2019.

Further RBI, vide its Master Direction DNBR.PD.002/03.10.119/2016-17 dated August 25, 2016 (last updated February 22, 2019) issued certain guidelines about the limit for acceptance of deposits across the sector, restricting it to 1.5 times of Net Owned Funds ("NoF") and also with minimum investment grade credit rating from the credit rating agencies. As on December 31, 2019, our Company has public deposits amounting to ₹ 19,366.31 lakh, being 1.26 times of NoF. Our Fixed Deposits are rated as MA- (Stable) by ICRA Limited.

This has resulted in limiting the company's ability to accept fresh deposits or renewal of existing deposits. As a result of the above circulars, our Company has reduced the dependence on raising the funds through privately placed non-convertible debentures and fixed deposits and will have to depend on other sources which could be more expensive, and might have an impact on the cost of funds and profitability.

Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. As an NBFC, we also face certain restrictions on our ability to raise money from international markets which may further limit our ability to raise funds at attractive rates. Any disruption in our primary funding sources at competitive rates would have a material adverse effect on our liquidity and financial condition.

11. *If we are unable to control or reduce the level of NPAs in our loan assets, our financial position, results of operations and cash flows may suffer.*

Our gross NPAs as a percentage of total loan assets were 4.68%, 5.05%, 5.11%, and 4.28% as at December 31, 2019, March 31, 2019, March 31, 2018 and March 31, 2017 respectively, while our net NPAs as a percentage of loan assets were 2.46%, 2.94%, 3.32% and 3.00% as at December 31, 2019, March 31, 2019 March 31, 2018 and March 31, 2017, respectively. We cannot be sure that we will be able to improve our collections and recoveries in relation to our NPAs, or otherwise adequately control or reduce our level of NPAs in future.

Based on the adoption of Ind AS for financial reporting from April 1, 2019, the Expected Credit Loss ("ECL") on our Loan assets were ₹ 2508 lakh as at December 31, 2019. We cannot be sure that we will be able to improve our collections and recoveries in relation to our NPAs, or otherwise adequately control or reduce our level of ECLs in future.

Moreover, as our loan portfolio increases, we may experience greater defaults in principal and/or interest repayments. Further, in certain cases where a customer has delayed payments but has demonstrated the ability to continue servicing the relevant loan in near future, we do not enforce the security and seize the vehicle, and allow the loan to continue without restructuring the same. Such cases affect the position of our asset quality and NPA provisioning/ ECL. There can also be no assurance that in such cases the customer would not continue to delay / default in making payments, which could adversely affect our profitability and cash flows. Thus, if we are not able to control or reduce our level of NPAs/ ECLs, the overall quality of our loan portfolio may deteriorate and our results of operations and/or cash flows may be adversely affected.

12. *Our customer portfolio mainly consists of Small / Medium Road Transport Operator ("SRTOs/MRTOs") who are generally more likely to be affected by declining economic conditions than large corporate borrowers. Any adverse change in economic condition impacting on the target customers could affect our business, financial conditions, results of operations and/or cash flows.*

Our primary business involves lending money to commercial vehicle owners and operators in India with focus on financing pre-owned commercial vehicle, and we are subject to customer default risks including default or delay

in repayment of principal or interest on our loans. Customers may default on their obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. If borrowers fail to repay loans in a timely manner or at all, our financial condition, results of operations and / or cash flows will be adversely affected.

Our customer portfolio principally consists of SRTOs / MRTOs with underdeveloped banking habits generally are less financially resilient than larger corporate borrowers and as a result, they can be more adversely affected by declining economic conditions. The owners and/or operators of commercial vehicles financed by us often do not have any credit history supported by tax returns and other related documents which would enable us to assess their credit worthiness. In addition, we may not receive updated information regarding any change in the financial condition of our customers or may receive inaccurate or incomplete information as a result of any fraudulent misrepresentation on the part of our customers. Furthermore, unlike several developed economies, a nation-wide credit bureau has only recently become operational in India. Accordingly, there is less financial information available about the creditworthiness of individuals, particularly our client segment who are mainly from the low income group and who typically have limited access to other financing sources. It is, therefore, difficult to carry out precise credit risk analysis of our clients. Although we follow certain procedures to evaluate the credit profile of our customers at the time of sanctioning a loan, we generally rely on the referrals from the local trucking community / existing customers and value of the commercial vehicle provided as underlying collateral rather than on a stringent analysis of the credit profile of our customers. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to continuously monitor the loan contracts, particularly of borrowers, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations, financial condition and/or cash flows.

13. *We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans which could adversely affect our business, financial condition, results of operations and/or cash flows.*

As a security for the financing facilities provided by us to our customers, the vehicles purchased by our customers are secured by lien, on the assets financed, in our favour. The value of the vehicle, however, is subject to depreciation, deterioration, and/or reduction in value on account of other extraneous reasons, over the course of time. Consequently, the realizable value of the collateral for the credit facility provided by us, when liquidated, may be lower than the outstanding loan from such customers. Any default in repayment of the outstanding credit obligations by our customers may expose us to losses. Furthermore, in the case of a default, we typically repossess the commercial vehicles financed and sell such vehicles. The hypothecated vehicles, being movable property, may be difficult to locate or seize in the event of any default by our customers. There can also be no assurance that we will be able to sell such vehicles provided as collateral at prices sufficient to cover the amounts under default. In addition, there may be delays associated with such process. A failure or delay to recover the expected value from sale of collateral security could expose us to a potential loss. Any such losses could adversely affect our financial condition, results of operations and/or cash flows. Furthermore, enforcing our legal rights by litigating against defaulting customers is generally long-drawn and potentially expensive process in India. Accordingly, it may be difficult for us to recover amounts owed by defaulting customers in a timely manner or we may not recover at all. The recovery of monies from defaulting customers may be further compounded by the fact that we do not generally insist on, or receive post-dated cheques as security towards the timely repayment of dues from customers to whom we have provided loans. Further, if we are unable to sell any repossessed vehicles provided as security for such loans, at commercially favourable prices, in a timely manner or at all, we may not recover the costs of maintaining such repossessed vehicles and our operations, cash flows and profitability could be adversely affected.

14. *Our collections in cash are in reasonably large quantum and consequently, we face the risk of misappropriation or fraud by our employees.*

Our branches collect and deposit approximately one-third of our customer's payments in cash. The cash collections may be exposed to the risk of fraud, misappropriation or unauthorized transactions by employees responsible for dealing with such cash collections. Although, there has been no reported past history of misappropriation or fraud, and we have taken insurance policies and coverage for cash in safe and adequate measures to prevent any

unauthorized transaction, fraud or misappropriation by our employees, officers and representatives, any such instances may adversely affect our cash flow, profitability and our reputation.

15. *Our significant indebtedness and the conditions and restrictions imposed by our financing arrangements could restrict our ability to conduct our business and operations in the manner we desire.*

As at December 31, 2019, we had a total outstanding debt of ₹ 1,00,900.84 lakh, (including Redeemable Cumulative Preference Shares treated as debt as per Ind AS) and we will continue to incur additional indebtedness in future. Most of our borrowings are secured by our immovables, hire purchase receivables and other assets. Our significant indebtedness could have several important consequences, including but not limited to the following:

- a portion of our cash flow may be used towards repayment of our existing debt, which will reduce the availability of our cash flow to fund working capital, capital expenditures, acquisitions and other general corporate requirements;
- our ability to obtain additional financing in future at reasonable terms may be restricted or our cost of borrowings may increase due to sudden adverse market conditions, including decreased availability of credit or fluctuations in interest rates;
- fluctuations in market interest rates may affect the cost of our borrowings, as some of our indebtedness are at variable interest rates;
- there could be a material adverse effect on our business, financial condition, results of operations and/or cash flows, if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements; and
- we may be more vulnerable to economic down-turn, may be limited in our ability to withstand competitive pressures and may have reduced flexibility in responding to changing business, regulatory and economic conditions.

Moreover, some of our borrowings may be recalled by our lenders at any time. If any of these lenders recall their loans, our cash position, business and operations may be adversely affected.

16. *Our financing arrangements contain restrictive covenants that may adversely affect our business and operations.*

Some of our financing agreements also include various conditions and covenants that require us to obtain lenders consent prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. Specifically, under some of our financing agreements, we require, and may be unable to obtain, consents from the relevant lenders for, among others, the following matters: entering into any scheme of merger; spinning-off of a business division; selling or transferring all or a substantial portion of our assets; making any change in ownership or control or constitution of our Company; making amendments in our Memorandum and Articles of Association; creating any further security interest on the assets upon which the existing lenders have a prior charge and raising funds by way of any fresh capital issue etc. For further details on the restrictive covenants under the financing arrangement, refer Chapter titled “**Financial Indebtedness**” on page 126 of this Prospectus.

Such covenants may restrict or delay certain actions or initiatives that we may propose to take from time to time. A failure to observe the covenants under our financing arrangements or to obtain necessary consents required thereunder may lead to the termination of our credit facilities, acceleration of recovery of all amounts due under such facilities and the enforcement of any security provided therefor. Any acceleration of recovery of amounts due under such facilities may also trigger cross default provisions under our other financing agreements. If the obligations under any of our financing documents are accelerated, we may have to allocate a substantial portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Further, during any period in which we are in default, we may be unable to raise, or face difficulties in raising further finance. Any of these circumstances could adversely affect our business, credit rating, financial condition, results of operations and/or cash flows. Moreover, any such action initiated by our lenders could result in the market price of our NCDs being adversely affected.

17. *We face increasing competition in our business which may result in declining margins, if we are unable to compete effectively.*

We primarily provide vehicle finance to SRTOs / MRTOs. Our primary competition, historically, has been with private unorganized financiers who principally operate in the local market. However, the significant growth in the commercial vehicle finance segment in recent periods has resulted in various banks and NBFCs increasing their focus on this sector. In addition, interest rate de-regulation and other liberalization measures affecting the commercial vehicle finance sector, together with increased demand for capital by SRTOs / MRTOs, have resulted in increased competition.

All of these factors have resulted in us facing increased competition from other lenders in the commercial vehicle finance sector, including commercial banks and other NBFCs. Our ability to compete effectively will depend, to some extent, on our ability to raise low-cost funding in future. Furthermore, as a result of increased competition in the commercial vehicle finance sector, vehicle finance products are becoming increasingly standardized and variable interest rate and payment terms and lower processing fees are becoming increasingly common. There can be no assurance that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive commercial vehicle finance industry. Increasing competition may have an adverse effect on our net interest margin and our income, and, if we are unable to compete successfully, our operating volume may decline.

18. *Our operations have regional concentration in Southern India and, therefore we are dependent on the general economic conditions and activities in these areas. Any adverse economic conditions in the area or a sustained change in consumer preferences in those regions would have impact on our business operation, financial position and cash flow.*

We have been operating in vehicle financing segment through our branch network spread mainly across Southern region of India. At present, we originate around 90% of our business from the States of Tamil Nadu and Kerala and balance from other States namely, Karnataka, Andhra Pradesh and Union Territory of Puducherry. Further, we believe that there is still good potential and growth available in Southern region of India from our existing as well as new customers and, intend to strategically expand our reach in target markets only. Our concentration in the Southern States exposes us to any adverse geological, ecological, economic and/or political circumstances in this region as compared to other NBFCs that have a pan India presence. If there is a sustained down-turn in the economy of Southern India or a sustained change in consumer preferences in those regions, our business operations may be adversely affected.

19. *We may not be able to successfully sustain our growth strategy.*

In recent years, we have experienced stable growth. Our growth strategy includes growing our loan book and expanding our customer base. There can be no assurance that we will be able to sustain our growth strategy successfully. If we grow our loan book too rapidly or fail to make proper assessments of credit risks associated with new borrowers, a higher percentage of our loans may become impaired, which would have a negative impact on the quality of our assets and our financial condition. We also face a number of operational risks in executing our growth strategy. We have experienced stable growth in our commercial vehicle finance business, our branch network has expanded gradually, and we are entering into new, smaller towns and cities within Southern part of India as part of our growth strategy. Our growth strategy exposes us to a wide range of increased risks, including business risks, such as the possibility that number of our impaired loans may grow faster than anticipated, as well as operational risks, fraud risks and regulatory and legal risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls. Moreover, our ability to sustain our rate of growth depends significantly upon our ability to manage key issues such as selecting and retaining key managerial personnel, maintaining effective risk management policies, continuing to offer products which are relevant to our target base of clients, developing managerial experience to address emerging challenges and ensuring a high standard of client service. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us.

20. Any downgrade of our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, as a result, would adversely affect our net interest margin and our business.

The cost and availability of capital is also dependent on our short-term and long-term credit ratings. Ratings reflect a rating agency's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. The following table sets out certain information with respect to our credit ratings:

Rating Agency	Instruments	Rating	Limit (₹ lakh)
ICRA Limited	Non-Convertible Debentures (Proposed)	[ICRA] BBB (Stable)	20,000
ICRA Limited	NCD (Existing)	[ICRA] BBB (Stable)	22,811
ICRA Limited	Fund Based Term Loan	[ICRA] BBB (Stable)	3,326
ICRA Limited	Fund Based Long Term Facilities from Banks - Cash Credit (CC)	[ICRA] BBB (Stable)	13,150
ICRA Limited	Fund Based Interchangeable	[ICRA] BBB (Stable) / [ICRA] A2	5,790
ICRA Limited	Short Term Facilities from Banks – WCDL	[ICRA] A2	100,00
ICRA Limited	Fixed Deposits	MA- (Stable)	-

Any downgrade of our credit ratings would increase borrowing costs and constrain our access to capital and debt markets and, as a result, would adversely affect our business and net interest margin. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any financing or refinancing arrangements in future.

21. A decline in our capital adequacy ratio could restrict our future business growth.

We have demonstrated stable growth in our business and in our profitability. Our assets under management have increased from ₹ 87,982.60 lakh as at March 31, 2015 to ₹ 93,525.21 lakh as at March 31, 2019.

Pursuant to RBI notification dated February 17, 2011, all deposit-taking NBFCs have to maintain a minimum capital adequacy ratio, consisting of Tier I and Tier II Capital, which shall not be less than 15% of its aggregate risk weighted assets of on-balance sheet and risk adjusted value of off-balance sheet items w.e.f. March 31, 2012. Further, pursuant to RBI circular dated November 10, 2014, all NBFCs-D, shall maintain minimum Tier I Capital of 10% (w.e.f. March 31, 2017). Our capital adequacy ratio computed on the basis of applicable RBI requirements was 22.35% and 21.95% as at March 31, 2019 and December 31, 2019, with Tier I Capital at 13.22% and 13.51%, respectively. If we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier I and Tier II Capital in order to continue to meet applicable capital adequacy ratios with respect to our business. There can be no assurance that we will be able to raise adequate additional capital in future on terms favorable to us or at all, and this may adversely affect the growth of our business.

22. System failures or inadequacy and security breaches in computer systems may affect our business.

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services.

Our ability to operate and remain competitive will depend on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available with us and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and branch network. Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result

in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we operate.

23. *We may face asset-liability mismatch which could affect our liquidity and consequently may affect our operations, profitability and/or cash flows.*

We face potential liquidity risks due to varying periods over which our assets and liabilities mature. As it is typical for NBFCs, a portion of our funding requirements is met through short-term funding sources such as bank loans, working capital demand loans, cash credit and short term loans. However, a large portion of our loan assets mature over a medium term. Consequently, our inability to obtain additional credit facilities or renew our existing credit facilities, in a timely and cost-effective manner or at all, may lead to mismatches between our assets and liabilities, which in turn, may adversely affect our operations, financial performance and/or cash flows. Further, mismatches between our assets and liabilities are compounded in the case of pre-payments of the financing facilities we grant to our customers.

24. *We have had negative net cash flows in the past and may have negative cash flows in future.*

The following table sets out our cash flow for the periods indicated:

Particulars	Half Year Ended September 30, 2019	For the Year Ended March 31,			
		2019	2018	2017	2016
Net cash from / (used in) Operating activities	1360.70	1506.89	9202.40	(2805.29)	(9869.95)
Net cash from / (used in) Investing activities	(67.91)	110.65	487.81	178.66	(946.15)
Net cash from / (used in) Financing activities	(713.91)	(2022.47)	(9040.61)	3013.43	464.38
Cash and cash equivalents at the beginning of the period / year	3359.77	3764.70	3115.10	2728.30	13080.02
Cash and cash equivalents at the end of the period / year	3938.65	3359.77	3764.70	3115.10	2728.30

(₹ lakh)

For further details, please see “**Financial Information**” on page 125 of this Prospectus. We cannot assure you at our net cash flows will be positive in future.

25. *We may be unable to adequately protect our intellectual property rights since our logo and/or tagline are currently not registered and therefore do not enjoy any statutory protection. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.*

We have made application for registration of logo and tag line of our Company under Trade Marks Act, 1999. Since our logo and tag line are not yet registered, we do not enjoy any statutory protection of our intellectual property rights. We may need to litigate in order to determine the validity of any claims and the scope of the proprietary rights of others. Any such litigation could be time consuming, costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate timely steps to enforce or protect our intellectual property rights. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.

26. *Our ability to assess, monitor and manage risks inherent in our business differs from the standards of some of our peers in India and in some developed countries.*

We are exposed to a variety of risks, including liquidity risk, interest rate risk, credit risk, operational risk and legal risk. The effectiveness of our risk management is limited by the quality and timeliness of available data. Our risk management techniques may not be fully effective in mitigating our risks in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Some methods of managing risks are based upon observed historical market behavior. As a result, these methods may not predict future risk exposures, which could be greater than the historical measures adopted. Other risk management methods depend upon an evaluation of information regarding markets, customers or other matters. This information may not in all cases be accurate,

complete, current, or properly evaluated. Management of operational, legal or regulatory risk requires, among other things, policies and procedures to properly record and verify a number of transactions and events. Although we have established these policies and procedures, they may not be fully effective. Our future success will depend, in part, on our ability to respond to new technological advances and evolving NBFC and vehicle finance sector standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction-processing systems to customer requirements or evolving market standards.

27. We may not be able to appropriately assess the credit worthiness of our customers before extending credit facilities to them. Unavailability of adequate information or inaccurate and/or incomplete information provided by our customers may adversely affect our operations and profitability.

In deciding whether to extend credit or enter into other transaction with customers, we rely on the information furnished to us by or on behalf of our customers. We may not, in certain instances, receive information regarding any change in the financial condition of our customers, or in certain cases our customers may provide inaccurate or incomplete information to us for whatever reason on their part. The lack of availability of information in connection with our customers may make it difficult for us to take an informed decision with regard to providing financial facilities to such persons and the attendant risk exposure in this regard. This may increase the likelihood of an increase in the level of NPAs, which would adversely affect our operations and profitability.

28. We are dependent on the expertise of our senior management team and our key technical and managerial personnel.

We are dependent on our senior management team for setting our strategic direction and managing our business, both of which are crucial to our success. Given the substantial experience of our senior management team, if any or all of them leave or are unable to continue to work with us, it may be difficult to find suitable replacements in a timely manner or at all. Our ability to retain experienced personnel as well as senior management will also in part, depend on us maintaining appropriate staff remuneration and associated benefits. We cannot be sure that the remuneration and benefits we have in place will be sufficient to retain the services of our senior management and skilled people. The loss of any of the members of our senior management or other key personnel may adversely affect our business, financial condition and results of operations.

29. Our promoters and promoter group owns 64.21% of our equity share capital and accordingly has the ability to exercise significant influence over the outcome of matters submitted to shareholders for approval, and their interests may differ from those of other holders of Equity Shares.

As at December 31, 2019, our promoters and promoter group own in aggregate 64.21% of our equity share capital. So long as the promoters and promoter group hold a majority of our Company's Equity Shares, they will be able to control most of the matters affecting our Company, including the appointment and removal of directors, business strategy and policies, any determinations with respect to mergers, business combinations and acquisitions, dividend payout and financing. Further, the extent of promoters and promoter group shareholding may result in delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the Company.

30. Some of our Directors and Key Management Personnel may have business interests in our Company other than reimbursement of expenses incurred and normal remuneration or benefits.

Some of our Directors and Key Management Personnel may be regarded as having business interests in our Company other than reimbursement of expenses incurred, normal remuneration or benefits. Some of our Directors may be deemed to be interested to the extent of Equity Shares held by them, as well as to the extent of any dividends, bonuses or other distributions on such Equity Shares. We cannot assure you that our Directors and our Key Management Personnel will exercise their rights as shareholders to the benefit and best interests of our Company. For further details, please see "*Capital Structure*" and "*Our Management*" on pages 56 and 112 respectively of this Prospectus.

31. Our Company has entered into related party transactions. Any transaction with related parties may involve conflict of interest.

Our Company has entered into certain transactions with promoters, promoter group companies / entities and directors. While we believe that all our related party transactions are on arm's length basis only, we cannot assure that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. Furthermore, it is likely that our Company may enter into related party transactions in future. Any future transactions with our related parties could potentially involve conflict of interest.

32. Some of our Group Companies have incurred losses in the recent past.

Some of our major Group Companies have incurred losses in recent fiscals as indicated below:

(₹ lakh)

Name of Group Company	Details of Profit / (Loss)		
	FY 2019	FY 2018	FY 2017
Sakthi Sugars Limited	(21325.07)	(17696.64)	2865.97
Sri Chamundeswari Sugars Limited	(267.46).	(628.54)	(874.10)

Ind AS is the basis of Accounting for computation of profit for All 3 FYs indicated above.

There can be no assurance that these or any of our other Group Companies will not incur losses in future periods or that there will not be an adverse effect on our Company's reputation or business as a result of such losses.

33. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business.

We require certain statutory and/or regulatory permits and approvals for our business. In future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in a timely manner or at all, and/or on favorable terms and conditions. Failure by us to comply with the terms and conditions to which such permits or approvals are subject, and/or to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

34. We may have to comply with strict regulations and guidelines issued by regulatory authorities in India particularly rules and regulations prescribed by the RBI as a deposit-taking NBFC and any changes in rules and regulations governing us could adversely affect our business.

We are principally governed by the RBI's rules and regulations on financial sector. We are also subject to corporate, taxation and other laws in India. The RBI's guidelines on financial regulation of NBFCs regulate, *inter alia*, capital adequacy, exposure and other prudential norms. The RBI also regulates the credit flow by banks to NBFCs and provides guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs. The laws and regulations governing the banking and financial services industry in India have become increasingly complex and cover a wide variety of issues, such as interest rates, liquidity, securitization, investments, ethical issues, money laundering and privacy. In some cases, there are overlapping regulations and enforcement agencies. Further, the RBI, from time to time, amends the regulatory framework governing NBFCs to address, *inter alia*, concerns arising from certain divergent regulatory requirements for banks and NBFCs.

Further, compliance with many of the regulations applicable to our operations in India, including any restrictions on investments, lending and other activities currently being carried out by our Company, involves a number of risks, particularly in areas where applicable regulations may be subject to varying interpretations. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and our business could be adversely affected.

We are also subject to changes in Indian laws, regulations and accounting principles and practices. There can be no assurance that the laws governing the Indian financial services sector will not change in future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not adversely affect our business and future financial performance.

- 35. *Our ability to borrow from various banks may be restricted on account of guidelines issued by the RBI imposing restrictions on banks in relation to their exposure to NBFCs. Any limitation on our ability to borrow from such banks may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.***

Under the RBI Master Circular on bank finance to NBFCs issued on July 01, 2015, the exposure (both lending and investment, including off-balance sheet exposures) of a bank to a single NBFC-AFC (Asset Financing Companies) should not exceed 15% of the bank's capital funds as per its last audited balance sheet. Banks may, however, assume exposures on such a single NBFC-AFC up to 20% of their capital funds provided the exposure in excess of 15% is on account of funds on-lent by the NBFC-AFC to the infrastructure sector. This limits the exposure that banks may have on NBFCs such as ours, which may restrict our ability to borrow from such banks and may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.

- 36. *Our insurance coverage may not adequately protect us against all potential losses to which we may be subject. Any liability in excess of our insurance claim could have a material adverse effect on our results of operations and financial position.***

We maintain such insurance coverage that we believe is adequate for our operations. We maintain insurance cover, for our free-hold real estate and tangible properties and infrastructure at all owned and leased premises, which provide insurance cover against loss or damage by fire, earthquake, electrical and machinery break-down. Further, we maintain insurance cover for cash in safe and cash in transit policy which provides insurance cover against loss or damage by theft, burglary, house breaking etc.

Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We cannot, however, assure that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, financial condition and results of operations.

- 37. *The land on which our registered office is built is on lease basis and not owned by us.***

The land on which our registered office is built was taken on lease basis by our Company from Sri M. Srinivaasan, Director of our Company in terms of a lease agreement executed on March 31, 1986 for a period of 30 years which ended on February 29, 2016. The lease has since been continuously renewed by way of an agreement entered into between our Company and Sri. M. Srinivaasan from time to time. The Company executed an agreement on January 27, 2020, for leasing of the premises for a further period of 11 months commencing from February 01, 2020, with a provision for renewal thereafter on mutually agreed terms and conditions. If the owner of the land, in future does not renew aforesaid lease agreement at all or on terms and conditions acceptable to us, we may suffer a disruption in administration, till we identify and shift to another location, which could adversely affect our business, financial condition and results of operations.

- 38. *We do not own majority of our branch premises. Any termination of arrangements for lease of our branches or our failure to renew the same in a favourable, timely manner, or at all, could adversely affect our business and results of operations.***

Except for 2 branch offices, which are located in owned premises, all our branches and customer service points are located on leased premises that we occupy pursuant to lease agreements/premise sharing agreements. If any of the owners of these premises do not renew the agreement under which we occupy the premises or if any of the owners seek to renew an agreement on terms and conditions unfavorable to us, we may suffer disruption in our operations or increased costs, or both, which may adversely affect our business and results of operation.

Further, some of our lease agreements with our Lessors may not be adequately stamped or duly registered. Unless such documents are adequately stamped or duly registered, such documents may be rendered as inadmissible as evidence in a Court in India, may not be authenticated by any public officer, or attract penalty as prescribed under applicable law, which impact our ability to enforce these agreements effectively, which may result in a material adverse effect on the continuance of the operations and business of our Company.

39. *Non obtaining of certain renewals / licenses for operation of our owned / leased offices.*

While we have obtained significant number of approvals / licenses, registrations and permits from the relevant authorities, we are yet to receive or apply for few approvals / licenses / registrations and permits. We cannot assure you that we will receive these approvals and clearances in time or at all. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay/non-receipt would adversely affect our related operations. Furthermore, under such circumstances the relevant authorities may restrain our operations, impose penalty / fine or initiate legal actions for our inability to comply with such renewals and / or approvals.

40. *Our results of operations could be adversely affected by any disputes with our employees.*

As on December 31, 2019, we have 502 employees on our rolls. While we believe that we maintain good relationships with our employees, there can be no assurance that we will not experience future disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations.

41. *Our ability to pay dividends in future will depend on our earnings, financial condition, cash flows, capital adequacy requirements, capital expenditures and restrictive covenants of our financing arrangements.*

Our ability to pay dividends in future will depend on our earnings, financial condition, cash flows, capital adequacy requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and subsequent approval of shareholders and will depend on factors that our Board of Directors and shareholders deem relevant, including among others, our future earnings, financial condition, cash flows, capital adequacy requirements, capital expenditures, business prospects and restrictive covenants under our financing arrangements. We may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. We cannot assure that we will be able to pay dividends at any point in future. For details of dividend paid by our Company in the past, please see ***“Other Regulatory and Statutory Disclosures”*** on page 181 of this Prospectus.

42. *Our Company, our Promoter and some of our Group Companies have availed or may avail certain loans that are callable by lenders, at any time, which may affect our Company’s reputation.*

Our Company, our Promoter and some of our Group Companies have availed or may avail loans that are repayable on demand at any time by the relevant lenders. Any such unexpected demand for immediate repayment may have a material adverse effect on the business, cash flows and financial condition of the entity from which repayment is sought.

43. *The Insolvency and Bankruptcy Code, 2016 (Bankruptcy Code) in India may affect our rights to recover loans from borrowers.*

The Insolvency and Bankruptcy Code, 2016 (***“Bankruptcy Code”***) was notified on August 5, 2016. The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnership firms (including LLPs) and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Any decision of the committee of creditors must be taken by a vote of not less than 75% of the voting share of all financial creditors. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it.

In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor’s assets are to be distributed. Before sale proceeds are distributed to a secured

creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees, and debts owed to unsecured creditors. Further, under this process, dues owed to the Central and State Governments rank on par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company's ability to recover our loans from the borrowers and enforcement of our Company's rights will be subject to the Bankruptcy Code.

As per the latest amendments to the IBC, the creditors to NBFCs can refer, any NBFC under the code, to initiate insolvency proceedings.

In case provisions of the Bankruptcy Code are invoked against us by our creditors, it may affect our Company's operations and functions.

Risks relating to the utilization of Issue proceeds

- 1. We have not entered into any definitive agreement to utilise a substantial portion of the net proceeds of the Issue. Further the fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.***

We intend to use the net proceeds for the purposes described in “*Objects of the Issue*” on page 66 of Prospectus. Our management will have broad discretion to use the net proceeds and you will be relying on the judgment of our management regarding the application of these net proceeds. Our funding requirements are based on current conditions and are subject to change in the light of changes in external circumstances or in our financial condition, business or strategy. Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time. Any such change in our plans may require rescheduling of our current plans or discontinuing existing plans and an increase or decrease in the fund requirements for the objects, at the discretion of the management. Pending utilisation for the purposes described above, we intend to temporarily invest the funds in interest-earning liquid instruments including deposits with banks and investments in liquid (not equity) mutual funds. Such investments would be in accordance with the investment policies approved by our Board from time to time.

Further, the fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. Further, as per the provisions of the Debt Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for this Issue.

Risks relating to the NCDs

- 1. There is no guarantee that the NCDs issued pursuant to this Issue will be listed on BSE in a timely manner, or at all.***

In accordance with Indian law and practice, permissions for listing and trading of the NCDs issued pursuant to this Issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of NCDs to be submitted and carrying out of necessary procedures with the Stock Exchange. There could be a failure or delay in listing the NCDs on the Stock Exchange. If permission to deal in and for an official quotation of the NCDs is not granted by the Stock Exchange, our Company will immediately repay, without interest, all monies received from the Applicants in accordance with prevailing law in this context, and pursuant to this Prospectus. Any failure or delay in obtaining the approval would restrict an investor's ability to trade in the NCDs. There is no assurance that the NCDs issued pursuant to this Issue will be listed on Stock Exchange in a timely manner, or at all.

2. *Changes in interest rates may affect the price of our NCDs.*

All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, *i.e.* when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

3. *Investors may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs.*

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors, *inter alia*, including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all. Although our Company will create appropriate security in favour of the Debenture Trustee for the NCD Holders on the assets adequate to ensure 100% asset cover for the NCDs, which shall be free from any encumbrances, the realizable value of the assets charged as security, when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the NCDs. Any failure or delay to recover the expected value from a sale or disposal of the assets charged as security in connection with the NCDs could expose Investors to a potential loss.

4. *Payments to be made on the NCDs will be subordinated to certain tax and other liabilities preferred by law.*

The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding-up, our Company's assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to these NCDs have been paid as per section 327 of the Companies Act, 2013. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts due on the NCDs.

5. *Any downgrading in credit rating of our NCDs may affect the value of NCDs and thus our ability to raise further debts.*

The NCDs proposed to be issued by our Company have been rated by ICRA Limited ("**ICRA**"). ICRA has *vide* its letter no. RTG/Chen/132/19-20 dated February 18, 2020 assigned a rating of "[ICRA] BBB (Stable)" for an amount up to ₹ 20,000 lakh for the NCDs. The rating of the NCDs by ICRA indicates moderate degree of safety regarding timely servicing of financial obligations and carry moderate credit risk. Any downgrade of our credit ratings would increase borrowing costs and restrict our access to capital and debt markets and, as a result, would negatively affect our net interest margin and our business. The ratings provided by ICRA may be suspended, withdrawn or revised at any time by the assigning rating agency and should be evaluated independently of any other rating. These ratings are not a recommendation to buy, sell or hold securities and investors should take their own decisions. Please refer to **Annexure C** on page 316 for the rationale for the above rating.

6. *There is no active market for the NCDs on the capital markets segment of the Stock Exchange. As a result, the liquidity and market prices of the NCDs may fail to evolve and may adversely affect the liquidity and market price.*

There can be no assurance that an active market for the NCDs will evolve. If an active market for the NCDs fails to evolve or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors, *inter alia*, including (i) the interest on similar securities available in the market and the general interest rate scenario in the country, (ii) the market price of our Equity Shares; (iii) the market for listed debt securities, (iv) general economic conditions, and (v) our financial performance, growth prospects and results of operations. Therefore, these factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which the NCDs are purchased and/or relatively illiquid.

7. *There may be a delay in making refunds to Applicants.*

We cannot assure that the monies refundable, on account of (a) withdrawal of applications, (b) our failure to receive minimum subscription in connection with the Issue, (c) withdrawal of the Issue, or (d) failure to obtain the final approval from the BSE for listing of the NCDs, will be refunded in a timely manner. We, however, shall refund such monies, with the interest due and payable thereon as prescribed under applicable statutory and/or regulatory provisions.

8. *This Prospectus includes certain unaudited financial information, which has been subjected to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited.*

This Prospectus includes certain unaudited financial information in relation to our Company, for the half year ended September 30, 2019 and for unaudited interim condensed financial information for nine months ended December 31, 2019, (both as per Ind AS) in respect of which the Statutory Auditors of our Company have issued their Limited Review Report dated December 13, 2019 and February 14, 2020, as also an Independent Auditor's Review on unaudited interim condensed financial information dated February 14, 2020.

As this financial information has been subject only to limited review as required by Regulation 33 of the Listing Regulations and as described in Standard on Review Engagements (“SRE”) 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Institute of Chartered Accountants of India, and not to an audit, any reliance by prospective investors on such unaudited financial information should accordingly, be limited. Moreover, our financial results for any given fiscal quarter or period, including the half year ended September 30, 2019 and quarter ended December 31, 2019, may not be directly comparable with our financial results for any full fiscal or for any other fiscal quarter or period. Accordingly, prospective investors to the Issue are advised to read such unaudited financial information in conjunction with the audited financial information provided elsewhere in this Prospectus.

9. *Payments made on the Unsecured NCDs will be subordinated to payments to secured and unsecured creditors and certain tax and other liabilities preferred by law.*

The Unsecured NCDs will be subordinated to all secured creditors of our Company as well as certain liabilities preferred by law such as to claims of the GoI on account of taxes, and certain liabilities incurred in the ordinary course of our transactions. In particular, in the event of bankruptcy, liquidation or winding-up, our assets will be available to pay obligations on the Unsecured NCDs only after all of those liabilities that rank senior to these Unsecured NCDs have been paid. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining, after paying amounts relating to these proceedings, to pay amounts due on the Unsecured NCDs. Further, there is no restriction on the amount of debt securities that we may issue in future, that may rank above the Unsecured NCDs. The issue of any such debt securities may reduce the amount recoverable by investors in the Unsecured NCDs on our bankruptcy, winding-up or liquidation.

10. *The NCDs are subject to the risk of change in law.*

The terms and conditions of the NCDs are based on Indian law in effect as on the date of issue of the relevant NCDs. No assurance can be given as to the impact of any possible judicial decision or change to Indian law or administrative practice after the date of issue of the relevant NCDs and any such change could materially and adversely impact the value of any NCDs affected by it.

11. *There are certain risks in connection with the Unsecured NCDs.*

The Unsecured NCDs will be in the nature of Subordinated Debt and hence the claims of the holders thereof will be subordinated to the claims of other secured and other unsecured creditors of our Company. Further, since no charge upon the assets of our Company would be created in connection with the Unsecured NCDs, in the event of default in connection therewith, the holders of Unsecured NCDs may not be able to recover their principal amount and/or the interest accrued thereon in a timely manner, for the entire value of the Unsecured NCDs held by them or at all. Accordingly, in such a case the holders of the Unsecured NCDs may lose all or a part of their investment therein. Further, the payment of interest and the repayment of the principal amount before the due maturity in connection with the Unsecured NCDs would be subject to the directions of RBI, which may also require our Company to obtain prior approval from the RBI in certain circumstances.

EXTERNAL RISK FACTORS

1. Our business is primarily dependent on the automobile and transportation industry in India.

Our business to a large extent depends on the continued growth in the automobile and transportation industry in India, which is influenced by a number of extraneous factors which are beyond our control, *inter alia*, including (a) the macroeconomic environment in India, (b) the demand for transportation services, (c) natural disasters and calamities, and (d) changes in regulations and policies in connection with motor vehicles. Such factors may result in a decline in the sales or value of new and pre-owned Commercial Vehicles (“CV”). Correspondingly, the demand for availing finance for new and pre-owned commercial vehicles may decline, which in turn may adversely affect our financial condition and the results of our operations. Further, the ability of CV owners and/or operators to perform their obligations under existing financing agreements may be adversely affected if their businesses suffer as a result of the aforesaid factors.

2. Increase in competition from our peer group in the CV finance sector may result in reduction of our operation, which in turn may adversely affect our profitability.

Our Company mainly provides loans to pre-owned CV owners and/or operators in semi-urban and rural areas in India. We have been facing increasing competition from domestic and foreign banks and NBFCs operating in the CV finance segment of the industry. Some of our competitors are very aggressive in underwriting credit risk and pricing their products and may have access to funds at a lower cost, wider networks and greater resources than our Company. Our financial condition and results of operations are dependent on our ability to obtain and maintain low cost funds and to provide prompt and quality services to our customers. If our Company is unable to access funds at a cost comparable to or lower than our competitors, we may not be able to offer loans at competitive interest rates to our customers. While our Company believes that it has historically been able to offer competitive interest rates on the loans extended to our customers, there can be no assurance that our Company will be able to continue to do so in future. An increase in competition from our peer group may result in a decline in our operation, which may in turn result in reduced incomes from our operations and may adversely affect our profitability.

3. Our growth depends on the sustained growth of the Indian economy. An economic slow-down in India and global conditions could have a direct impact on our operations and profitability.

Macroeconomic factors that affect the Indian economy and the global economic scenario have an impact on our business. The quantum of our disbursements is driven by the growth in demand for CVs. Any slow-down in the Indian economy may have a direct impact on our disbursements and a slow-down in the economy, as a whole, can increase the level of defaults which may affect our Company’s profitability, asset quality and growth plans.

4. Political instability or changes in the government could delay further liberalization of the Indian economy and adversely affect economic conditions in India generally, which could impact our business.

The GoI and various state governments over a period of time have been pursuing economic policies including encouraging private sector participation by relaxing restriction. There can be no assurance that these policies will continue in future as well. The rate of economic liberalization could change, and specific laws and policies affecting financial services companies, foreign investment, currency exchange rates and other matters affecting investments in Indian companies could change as well. A significant slow-down in India’s economic liberalization and deregulation policies could disrupt business and economic conditions in India, thus affecting our business. Any political instability in the country, including any change in the Government, could materially impact our business adversely.

5. Civil unrest, terrorist attacks and war would affect our business.

Terrorist attacks and other acts of violence, war or conflicts, particularly those involving India, as well as the United States of America, the United Kingdom, Singapore and the European Union, may adversely affect Indian and global financial markets. Such acts may negatively impact business sentiment, which could adversely affect our business and profitability. India has, from time to time, experienced, and continues to experience, social and civil unrest, terrorist attacks and hostilities with neighbouring countries. Also, some of India’s neighbouring countries have experienced, or are currently experiencing internal unrest. This, in turn, could have a material adverse effect on the Indian economy and in turn may adversely affect our operations and profitability and the market for the NCDs.

6. *Our business may be adversely impacted by natural calamities or unfavorable climatic changes.*

India, Bangladesh, Pakistan, Indonesia, Japan and other Asian countries have experienced natural calamities such as earthquakes, floods, droughts and a tsunami in recent years. These economies could be affected by the extent and severity of such natural disasters and pandemics may affect the financial services sector, of which our Company is a part. Prolonged spells of abnormal rainfall, drought and other natural calamities may have an adverse impact on the economy, our business and the price of our NCDs.

7. *Any downgrading of India's sovereign rating by any of the international rating agencies may affect our business and our liquidity to a great extent.*

Any adverse revision to India's credit rating for domestic and international debt by any of the international rating agencies may adversely impact our ability to raise additional finances at favorable interest rates and other commercial terms. This could have an adverse effect on our growth, financial performance and our operations.

8. *Trade deficits could adversely affect our business.*

India's trade relationships with other countries and its trade deficit may adversely affect Indian economic conditions. In the fiscal year 2019 (April to September 2019), India experienced a trade deficit of US\$ 84.3 bn as against US\$ 95.8 bn (April-September 2018) showing a decline as per press release of RBI dated December 31, 2019. If trade deficits increase or are no longer manageable, the Indian economy suffers, and therefore our business and our financial performance could be adversely affected.

9. *Financial difficulty and other problems in certain financial institutions in India could adversely affect our business.*

As an Indian NBFC, we are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is sometimes referred to as "systemic risk", may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis and who may default on their obligations due to bankruptcy, lack of liquidity, operational failure or other reasons. Any such difficulties or instability of the Indian financial system in general could create an adverse market perception about Indian financial institutions and banks and hence adversely affect our business. As the Indian financial system operates within an emerging market, it faces risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme.

10. *Companies operating in India are subject to a variety of Central and State government taxes and levies. Any increase in tax rates could adversely affect our business and results of operations.*

Tax and other levies imposed by the central and state governments in India that affect our tax liability include Central and State Taxes and other levies, Income Tax, GST, Stamp Duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the Central and State Tax Scheme in India is extensive and subject to change from time to time. The Statutory Corporate Income Tax in India, which includes a tax, an education cess on the tax and the surcharge, is currently 25.17%. The Central or State Government may in future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Any additional tax exposure could adversely affect our business and results of operations.

11. *A decline in India's foreign exchange reserves may affect liquidity and interest rates in the Indian economy, which could adversely impact us.*

According to the weekly statistical supplement released by the RBI, India's foreign exchange reserves totalled US\$ 476092 million as on February 14, 2020 (*Source: RBI Website as on February 14, 2020*). A decline in India's foreign exchange reserves could impact the valuation of the Rupee and could result in reduced liquidity and higher interest rates which could adversely affect our financial condition.

12. MCA vide press release dated January 18, 2016 has announced Ind AS road map for scheduled commercial banks, insurance companies and non-banking financial companies. Ind AS is applicable to our company with effect from April 01, 2019 and we may be affected by this transition.

MCA vide press release dated January 18, 2016 has announced Indian Accounting Standards (“**Ind AS**”) road map for scheduled commercial banks, insurance companies and non-banking financial companies. As per the aforesaid press release, the same has become applicable for NBFCs with effect from April 1, 2018 in phases. Listed NBFCs with less than ₹50,000 lakh of net worth will be mandatorily covered under Ind AS with effect from April 1, 2019, as a part of Phase II.

As the current year is the first full financial year for which the accounting and financial statements will be presented as per the Ind AS requirements and we have not determined with any degree of certainty the impact that such adoption will have on our financial reporting. Additionally, Ind AS has fundamental differences with the existing accounting standards and therefore, financial statements prepared under Ind AS may differ substantially from financial statements prepared under the existing framework of accounting standards. There can be no assurance that our financial condition, results of operation, cash flows or changes in shareholders’ equity will not appear materially different under Ind AS and Indian GAAP. On adoption of Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. There can be no assurance that adoption of Ind AS, will not affect our reported results of operations, and financial conditions.

13. Trading of the NCDs may be limited by temporary exchange closures, broker defaults, settlement delays, strikes by brokerage firm employees and disputes.

The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

Our Company, the Directors, affiliates, associates and their respective directors and officers, Lead Manager and the Registrar to the Issue shall not take any responsibility for acts, mistakes, errors, omissions and commissions etc. in relation to ASBA Applications accepted by the Designated Intermediaries, Applications uploaded by SCSBs, Applications accepted but not uploaded by SCSBs or Applications accepted and uploaded without blocking funds in the ASBA Accounts. It shall be presumed that for Applications uploaded by SCSBs, the Application Amount has been blocked in the relevant ASBA Account. Further, all grievances against Designated Intermediaries in relation to this Issue should be made by Applicants directly to the relevant Stock Exchange.

OUR STRENGTH

Unique Business Model

We are an asset finance company with primary focus on financing pre-owned commercial vehicles. Our target customers comprise SRTOs/ MRTOs, primarily hailing from rural/semi-urban area. These SRTOs/ MRTOs generally find difficulty in obtaining finance from banks on account of their limited credit history and inability to meet the lending covenants of the banks. At the same time, local money lenders offer speedy and flexible finance however, at an extensively high rate. We identified this opportunity and positioned ourselves between banks and local money lenders to service this population. We have adopted a prompt loan approval and simple documentation procedures, set our offer rates between those of the banks and the money lenders. We believe that we, among the few financial institutions in the organized sector, satisfy the need of the target customers.

Effective origination, credit appraisal and collection processes

We have nearly four decades of experience in the asset financing business. We have established an effective process for origination, monitoring and collecting receivables which enabled us to generate the stable growth with control over asset quality.

Our target customers mainly hail from rural/semi-urban area. For such customer segment, the knowledge of local culture and long relationship with the customers play a key role for growth in the operation. We have adopted distinguished and cost effective business originate as part of loan policy, where we originate the business through our branch networks in association with marketing officers termed as Customer Service Points (“CSPs”). These CSPs are local residents of the area and have the domain knowledge of that area. They identify potential customers in defined area and maintain long term relationship with the existing customers. Further, this business model also enables us to be proactive and develop future products for our customers. Moreover, we find that the CSP arrangement is cost effective as they function from Small Office Home Office (“SOHO”) provided by our Company without being a formal branch set-up.

We have designed stringent evaluation process and credit policies to ensure the asset quality of our loans and the security provided for such loans. Our credit policy comprises classification of target customers in terms of track record, classification of assets, differentiated loan to value ratio for different class of customers and assets, limits on customer exposure *etc.* Further, in order to build quality assets and reduce NPA level, we have developed a culture of accountability by making our marketing officers responsible for loan administration, monitoring as well as recovery of the loans they originate. With our long- standing understanding and experience in the pre-owned vehicle finance segment, we have developed expertise in valuation of pre-owned vehicles which enables us to accurately determine a recoverable loan amount for commercial vehicle. We believe our Company has established a tested valuation technique for the assets which acts as a crucial entry barrier for others seeking to enter our market segment.

Our entire recovery and collection operation is administered in-house and we do not outsource loan recovery and collection operations. We believe that our loan recovery procedure is particularly well-suited to our target market in the commercial vehicle financing industry, as reflected by our high loan recovery ratios compared to others in the financial services industry, and we believe that this knowledge and relationship based recovery procedure is difficult to replicate in the short to medium term.

Long-standing presence in southern regional market

We have been operating in vehicle financing Industry for nearly four decades focusing on Southern part of India particularly in the States of Tamil Nadu and Kerala. We have a network of 49 branches with more than 90% branches located in Tamil Nadu and Kerala. We believe that our continuous focus and presence in the concentrated regional market enabled us to understand customers’ requirements and create long and trust-worthy relationship with them by providing quality service and support as per the requirements from proximate locations. At present 50% - 60% of our total business comes from the existing customers only.

A. IMPLICATIONS UNDER THE INCOME TAX ACT, 1961 ('I.T. ACT')

I. To the Resident Debenture Holder

Interest Income

1. Interest on NCD received by Debenture holder(s) would be subject to tax at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act and such tax would need to be withheld at the time of credit/payment as per the provisions of Section 193 of the I.T. Act. However, no income tax is deductible at source in respect of the following:

- a. On any security issued by a company in a dematerialized form and is listed on recognized stock exchange in India in accordance with the Securities Contracts (Regulation) Act, 1956 and the rules made thereunder.
- b. In case the payment of interest on debentures to a resident individual or a Hindu Undivided Family ('HUF'), Debenture Holder does not or is not likely to exceed ₹ 5,000 in the aggregate during the Financial Year and the interest is paid by an account payee cheque.
- c. When the Assessing Officer issues a certificate on an application by a Debenture Holder on satisfaction that the total income of the Debenture Holder justifies no/lower deduction of tax at source as per the provisions of Section 197(1) of the I.T. Act; and that certificate is filed with the Company before the prescribed date of closure of books for payment of debenture interest.
- d. (i) When the resident Debenture Holder with Permanent Account Number ('PAN') (not being a company or a firm) submits a declaration as per the provisions of Section 197A (1A) of the I.T. Act in the prescribed Form 15G verified in the prescribed manner to the effect that the tax on his estimated total income of the financial year in which such income is to be included in computing his total income will be NIL. However under section 197A(1B) of the I.T. Act, "Form 15G cannot be submitted nor considered for exemption from tax deduction at source if the aggregate dividend income referred to in section 194, interest on securities, interest, withdrawal from NSS and income from units of mutual fund or of Unit Trust of India as the case may be or the aggregate of the amounts of such incomes credited or paid or likely to be credited or paid during the previous year in which such income is to be included exceeds the maximum amount which is not chargeable to income tax".

To illustrate, as on 01.04.2019—

- ☐ the maximum amount of income not chargeable to tax in case of individuals (other than senior citizens and super senior citizens) and HUFs is ₹ 2,50,000/-;
- ☐ in the case of every individual being a resident in India, who is of the age of 60 years or more but less than 80 years at any time during the Financial year (Senior Citizen) is ₹ 3,00,000/-;
- ☐ In the case of every individual being a resident in India, who is of the age of 80 years or more at any time during the Financial year (Super Senior Citizen) is ₹ 5,00,000.

Further, Section 87A provides a rebate of 100 percent of income-tax or an amount of ₹ 12,500 whichever is less to a resident individual whose total income does not exceed ₹ 5,00,000 for the Financial year 2019-20.

(ii) Senior citizens, who are 60 years of age or more at any time during the financial year, enjoy the special privilege to submit a self-declaration in the prescribed Form 15H for non-deduction of tax at source in accordance with the provisions of section 197A(1C) of the I.T. Act even if the aggregate income credited or paid or likely to be credited or paid exceeds the maximum amount not chargeable to tax, provided that the tax due on total income of the person is Nil.

(iii) In all other situations, tax would be deducted at source as per prevailing provisions of the I.T. Act. Form 15G with PAN / Form 15H with PAN / Certificate issued u/s 197(1) has to be filed with the Company before the prescribed date of closure of books for payment of debenture interest without any withholding of tax.

2. In case where tax has to be deducted at source while paying debenture interest, the Company is not required to deduct Surcharge and Health & Education Cess.

Capital Gain

3. As per the provisions of section 2(29A) of the IT Act, read with section 2(42A) of the I.T. Act, a listed debenture is treated as a long-term capital asset if the same is held for more than 12 months immediately preceding the date of its transfer.

As per section 112 of the I.T. Act, Capital Gains arising on the transfer of long-term capital assets being listed securities are subject to tax at the rate of 20% of Capital Gains calculated after reducing indexed cost of acquisition or 10% of Capital Gains without indexation of the cost of acquisition. The Capital Gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition/indexed cost of acquisition of the debentures from the sale consideration.

Act, is not available in case of bonds and debentures, except capital indexed bonds issued by the Government and sovereign gold bonds issued by the RBI. Accordingly, Long Term Capital Gains arising out of listed debentures, would be subject to tax at the rate of 10%, computed without indexation.

In case of an individual or HUF, being a resident, where the total income as reduced by such Long-Term Capital Gains is below the maximum amount which is not chargeable to income-tax, then, such Long-Term Capital Gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and the tax on the balance of such Long Term Capital Gains shall be computed at the rate mentioned above.

4. Short-term Capital Gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act. The provisions relating to maximum amount not chargeable to tax described at para 3 above would also apply to such Short-Term Capital Gains.
5. In case the debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act.
6. As per Section 74 of the I.T. Act, short-term capital loss on debentures suffered during the year is allowed to be set-off against short-term capital gains of the said year. Balance loss, if any could be carried forward for eight years for claiming set-off against subsequent years' short-term as well as long term capital gains. Long-term capital loss on debentures suffered during the year is allowed to be set-off only against long-term capital gains. Balance loss, if any could be carried forward for eight years for claiming set-off against subsequent year's long-term capital gains.
7. Interest on application money and interest on refund application would be subject to tax at the normal rates of tax in accordance with and subject to the provisions of the I.T Act and such tax would need to be withheld at the time of credit/payment as per the provisions of Section 194A of the I.T. However, if the said notified bonds are transferred or converted into money within a period of three years from their date of acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long term capital gains in the year in which the bonds are transferred or converted into money. If the residential house in which the investment has been made is transferred within a period of three years from the date of its purchase or construction, the amount of Capital Gains tax exempted earlier would become chargeable to tax as Long Term Capital Gains in the year in which such residential house is transferred. Similarly, if the Debenture holder purchases within a period of two years or constructs within a period of three years after the date of transfer of capital asset, another residential house (other than the new residential house referred above), then the original exemption will be taxed as Capital Gains in the year in which the additional residential house is acquired.

OVERVIEW OF THE INDIAN ECONOMY

India, with a Gross Domestic Product ("GDP") in terms of Gross Value Added {GVA} of ₹171,99,815 crore (PE) (at constant price on new series 2011-12 base) [Source: Government of India, Ministry of Statistics & Programme Implementation press note dated May 31, 2019] at the end of financial year 2019, is the sixth largest economy in the world after USA, China, Japan, Germany and UK.

With the change in base from 2004-05 level to new series of 2011-12 and change in the concept of GDP to GVA, the growth parameters in terms of GVA over last three years can be considered to be reasonable and the GDP growth for the year 2018-19 at Current Prices (PE) was reported to be 11.2%. The provisional estimates for the FY 2018-19 the GDP in terms of GVA was ₹ 1,29,06,936 crore (at constant price on new series 2011-12 base.)

(Source: GoI, Ministry of Statistics & Programme Implementation Press release dated May 31, 2019)

The Indian economy is headed for somewhat slower growth, estimated to be 6.1% in 2018-19 and around 6% in 2019-20. The lower growth is on account of the issues faced by the financial sector and general slow-down in global economy. The year 2018-19 and H1 of 2019-20 also witnessed significant steps being undertaken towards resolution of problems associated with non-performing assets of the banks, measures to restore credit flows to NBFCs, etc.

A snapshot on the sectoral growth of GDP for the last three years at constant price (new series 2011-12 prices) with provisional estimates for FY 2018-19 is furnished below:

Concerns and Outlook:

The slow-down in global and domestic growth impulses in the recent past impinged on credit demand. The asset quality, capital adequacy and profitability of scheduled commercial banks improved after a long period of stress, although challenges emerged from other areas like non-banking financial companies and co-operative banks. Going forward, issues such as resolution of stressed assets, weak corporate governance, and frauds need to be addressed to reaffirm a robust financial sector that minimises systemic risks.

The average crude oil (Indian basket) prices have risen by around 23 per cent so far in 2018-19 (April-March 2019)) *vis-à-vis* 2017-18 and is around US\$ 63.8 (Average since April to date). Going by the recent trends, the average crude oil prices could be in the vicinity of US\$ 65-67 per barrel in the current financial year and could rise further by another 10-15 per cent in remaining period of FY2019-20. Some of these factors could have dampening effect on GDP growth in the coming year. (Source: Web site of Ministry of Petroleum GoI Accessed on December 19, 2019)

The Gross Domestic Product (GDP) growth is around 4 percentage points higher than global growth average of last 3 years and nearly 3 percentage points more than the average growth achieved by emerging market and developing economies. Further other measures like introduction of certain reforms in Foreign Direct Investment (e.g. 100% in railway Infrastructure, financial services provided by NBFCs and also investment in Asset Reconstruction Companies and access of External Commercial Borrowing to NBFCs for resource raising), further strengthening of the Insolvency and Bankruptcy Code 2016, recapitalization of Public sector banks and Government support to boost credit flow to MSME sectors will also lead to improvement in the growth of Indian Economy in medium and long-term, notwithstanding certain short term aberrations.

Global Prospect and Indian Economy

The IMF World Economic Outlook December 2019 (Tentative) updates has stated the Global growth is projected to raise from 2.9 percent (estimated) in 2019 and 3.3% in 2020, 0.4% lower than the forecast of the October 2019 World Economic Outlook (WEO). The downward revision primarily reflects negative surprises to economic activity in a few emerging market economies, notably India, which led to a reassessment of growth prospects over the next two years. In a few cases, this reassessment also reflects the impact of increased social unrest.

In the third quarter of 2019, growth across emerging market economies (including India, Mexico, and South Africa) was weaker than expected at the time of the October WEO, largely due to country-specific shocks weighing on domestic demand. Despite continued job creation (in some cases, in the context of unemployment rates already at record lows), core consumer price

inflation remained muted across advanced economies. It softened further across most emerging market economies amid more subdued activity.

Temporary factors that had slowed global manufacturing — auto sector adjustments to new emissions standards, a lull in the launch of new tech products, and inventory accumulation appeared to fade. Business sentiment and the outlook of purchase managers in the manufacturing sector ceased deteriorating, but remained pessimistic overall. Importantly, the new orders subcomponent of the surveys picked up, particularly in emerging market economies. Consistent with the surveys, world trade growth appeared to be bottoming out. Service sector activity on the other hand weakened somewhat but remained in expansionary territory, supported by still-resilient consumer spending which, in turn, helped maintain tight labor markets, low unemployment, and modestly rising wages.

The report also states that portfolio flows to emerging market economies strengthened, particularly to bond funds. The most notable movement across major currencies was the appreciation of the British pound (4 percent since September) on perceptions of reduced risks of a no-deal Brexit. As per the report, financial conditions thus remain broadly accommodative across advanced and emerging market economies.

The report indicates that growth in emerging and developing Asia is forecast to inch up slightly from 5.6 percent in 2019 to 5.8 percent in 2020 and 5.9 percent in 2021 (0.2 and 0.3 percentage point lower for 2019 and 2020 compared to the October WEO). As per the report, the growth markdown largely reflects a downward revision to India's projection, where domestic demand has slowed more sharply than expected amid stress in the nonbank financial sector and a decline in credit growth. India's growth is estimated at 4.8 percent in 2019, projected to improve to 5.8 percent in 2020 and 6.5 percent in 2021 (1.2 and 0.9 percentage point lower than in the October WEO), supported by monetary and fiscal stimulus as well as subdued oil prices.

To strengthen resilience, policymakers should address financial vulnerabilities that pose risks to growth in the medium term. Making growth more inclusive, which is essential for securing better economic prospects for all, should remain an overarching goal.

As per the report, across advanced economies, growth is projected to stabilize at 1.6 percent in 2020–21 (0.1 percentage point lower than in the October WEO for 2020, mostly due to downward revisions for the United States, euro area and the United Kingdom, and downgrades to other advanced economies in Asia, notably Hong Kong SAR following protests.

The Indian economy is expected to perform better than the global economy over the next few years. Growth in the ASEAN-5 group of economies is expected to stabilize at around 5.2 percent as domestic demand remains healthy and exports continue to recover. While US is expected to grow at 2.4 percent in 2019 and 2.1 percent in 2020. Growth in the euro area economy is projected to slow to 1.2 percent in 2019 and pick up to 1.4% in 2020. EU, Japan and China were expected to see a marginal decline in GDP growth. In comparison, India's growth rate is expected to rise from 6.1 percent in 2019 to 7.0 percent in 2020. (Source WEO October 2019). As per IMF, India is the Fifth largest economy.

NON-BANKING FINANCIAL COMPANIES (NBFCs)

Overview

Non-Banking Financial Companies ("NBFCs") are an integral part of the country's financial system, catering to a large market of niche customers, and have emerged as one of the major purveyors of retail and SME credit in India. Non-Banking Financial Institutions ("NBFIs") are an important alternative channel of finance for the commercial sector in India's bank dominated financial sector. Their role in promoting financial inclusion and catering to the needs of small businesses and specialised segments is an additional dimension of their relevance in the Indian context. It is a heterogeneous group of institutions (other than commercial and co-operative banks) performing financial intermediation in a variety of ways, such as accepting deposits, making loans and advances, providing leasing/hire purchase services, among others. Regulations relating to governing Non-Banking Financial Companies ("NBFCs") are being increasingly harmonised with those of banks to forge the right balance for financial stability while encouraging them to focus on specialised areas. The RBI defines an NBFC as a company registered

under the Companies Act 1956 and 2013 and engaged in the business of loans and advances, acquisition of shares, stock, bonds, debentures, and securities issued by the GoI or local government authorities, or other securities of like marketable nature, leasing, hire-purchase, insurance business, chit business. However, this excludes institutions whose principal business is in the agricultural or industrial sector, or in the sale, purchase and construction of immovable property. A non-banking entity that has as its principal line of business the receipt of deposits, under any scheme or arrangement, or the extension of loans, in any manner, is also considered an NBFC.

Gradually, NBFCs have become recognized as complementary to the banking sector due to their customer-oriented services, simplified procedures, and attractive rates of return on deposits, flexibility and timeliness in meeting the credit needs of specified sectors, among other reasons. NBFCs have traditionally extended credit across the country through their widespread geographical presence, with NBFCs supplying credit in segments such as equipment leasing, hire purchase, and consumer finance. These are areas which warrant infusion of financing due to the existing demand-supply gap. NBFCs have provided a more flexible source of financing and have been able to disburse funds to a gamut of clientele, from local individual customers to a variety of corporate clientele. NBFCs can be divided into deposit taking NBFCs, *i.e.*, those which accept deposits from the public and non-deposit taking NBFCs being those which do not accept deposits from the public.

Apart from commercial banks and co-operative credit institutions (urban and rural), the financial system in India consists of a wide variety of NBFIs, such as Non-Banking Financial Companies ("**NBFCs**"), financial institutions and primary dealers. NBFCs, the largest component of NBFIs, can be distinguished from banks with respect to the degree and nature of regulatory and supervisory controls. First, the regulations governing these institutions are relatively lighter as compared to banks. Secondly, they are not subject to certain regulatory prescriptions applicable to banks. For instance, NBFCs are not subject to Cash Reserve Requirement ("**CRR**") like banks. They are, however, mandated to maintain 15 per cent of their public deposit liabilities in Government and other approved securities as Statutory Liquidity Ratio ("**SLR**"). Thirdly, they do not have deposit insurance coverage and refinance facilities from the Reserve Bank. Fourthly, NBFCs do not have cheque issuing facilities and are not part of the payment and settlement system. Finally, NBFCs cannot accept demand based deposit. (Source: www.rbi.gov.in).

Initially, the NBFCs registered with the RBI could only operate as equipment leasing companies, hire purchase companies, loan companies and investment companies. Efforts have been made to integrate NBFCs into the mainstream financial sector by strengthening the prudential guidelines relating to income recognition, asset classification and provisioning. A number of measures to enhance the regulatory and supervisory standards of NBFCs in order to put them on par with commercial banks were undertaken by the RBI over a period of time including the alignment of interest rates, allowing diversification of businesses *e.g.* issuance of co-branded cards and distribution of mutual fund and insurance products, regulation of systemically important NBFCs and introduction of a fair practices code and corporate governance. Further the spectrum of Non-Banking Financial Institutions has been classified as NBFCs, AIFIs and Primary Dealers.

NBFC Structure

Initially the NBFCs were categorized into 2 major categories Systematically Important ("**SI**") Deposit taking (D) and Non-Deposit taking. The NBFCs (SI-D) were sub-classified as (a) Loan Company (b) Investment Company (c) Assets Finance Company and (d) Residuary NBFCs. Under NBFCs (SI-ND) these were classified as (i) Loan Company (ii) investment company (iii) Asset Finance Company (iv) Infra Finance Company (v) Core Investment Company and (vi) Infrastructure Debt Fund.

Recently, RBI has harmonized the classifications of NBFCs by activity as per details as under:

SI No	Type of NBFC	Activity
1	Investment and Credit Company (ICC)	Lending and Investments
2	NBFC - Infrastructure Finance Company (NBFC-IFC)	Provision of infrastructure Loans.
3	NBFC - Systemically Important Core Investment Company (CIC-ND-SI)	Investment in equity shares, Preference shares, debt or loans of group companies.
4	Infrastructure Debt Fund - NBFC (IDF-NBFC)	Facilitation of flow of long term debt into infrastructure projects
5	NBFC - Micro Finance Institution (NBFC-MFI)	Extending credit to economically disadvantaged groups
6	NBFC - Factor	Acquisition of receivables of an assignor or extending loans against security interest of the receivables at a discount.
7	NBFC - Non-Operative Financial Holding Company (NOFHC)	Facilitation of promoters / promoter groups to set up a new bank
8	Mortgage Guarantee Company (MGC)	Undertaking of mortgage guarantee business

9	NBFC - Account Aggregator (NBFC-AA)	Collecting and providing information about a customer's financial assets in a consolidated, organised and retrievable manner to the customer or others as specified by the customer
10	NBFC - Peer to Peer Lending Platform (NBFC-P2P)	Providing an on-line platform to bring lenders and borrowers together to help mobilise funds
11	Housing Finance Companies	Financing for Housing

RBI by its Circular No RBI/2018-19/130 dated February 22, 2019 has taken a decision for harmonization of different categories of NBFCs into fewer ones based on the principle of regulation by activity rather than regulation by entity. Accordingly, it has been decided to merge the three categories of NBFCs viz. Asset Finance Companies (AFC), Loan Companies (LCs) and Investment Companies (ICs) into a new category called NBFC - Investment and Credit Company (NBFC-ICC). Our company being an Asset Finance Company is categorized as NBFC-ICC.

This move is expected to provide NBFCs with greater operational flexibility, As per the above circular, all related Master Directions (Non-Banking Financial Company – Non-Systemically Important Non-Deposit taking Company (Reserve Bank) Directions 2016, Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions 2016, Non-Banking Financial Companies. Acceptance of Public Deposits (Reserve Bank) Directions 2016, Standalone Primary Dealers (Reserve Bank) Directions, 2016 and Residuary Non-Banking Companies (Reserve Bank) Directions, 2016) have been updated accordingly.

Ownership pattern of NBFCs and Growth

The NBFC sector is dominated by NBFCs- ND-SI, which constitute 86.3 per cent of the total asset size of the sector. Within this segment, government owned NBFCs (particularly the two largest NBFCs i.e., Power Finance Corporation Limited and REC Limited) hold around two fifth of the total assets. NBFCs-D accounted for only 13.7 per cent of the total assets of the NBFC sector at the end of March 2019, with 89.7 per cent of all NBFCs-D assets held by non-government companies. Public non-government companies are the dominant sub-group among the deposit taking NBFCs.

Balance Sheet Size

Although the NBFC sector grew in size from ₹ 26.2 lakh crore in 2017-18 to ₹ 30.9 lakh crore in 2018-19, the pace of expansion was lower than in 2017-18 mainly due to rating downgrades and liquidity stress in a few large NBFCs in the aftermath of the IL&FS crisis. This slow-down was witnessed mainly in the NBFCs-ND-SI category, whereas, NBFCs-D broadly maintained their pace of growth. However, in 2019-20 (up to September) growth in balance sheet size of NBFCs-ND-SI as well as NBFCs-D moderated due to a sharp deceleration in credit growth.

Amongst NBFCs-ND-SI, ICCs and IFCs together account for 85.6 per cent of the total asset size of the segment at end-March 2019. Despite liquidity stress faced by the sector, there was expansion in asset size of IFCs. Balance sheets of micro finance institutions or NBFCs-MFI also expanded on the back of strong growth in their loans and advances, especially to the agriculture sector. For other categories of NBFCs, excluding CICs, however, the growth of loans and advances moderated during 2018-19. NBFCs-D largely comprise AFCs and LCs; since merged into a new category called ICC. In both these categories, moderation in credit expansion led to the share of investments in total assets rising from 3.5 per cent in 2017-18 to 5.7 per cent 2018-19. On the liabilities side, LCs and AFCs witnessed a spurt in deposit growth in 2018-19 and 2019-20 (up to September), augmenting their resource base.

NBFC Funding Pattern:

(A) General:

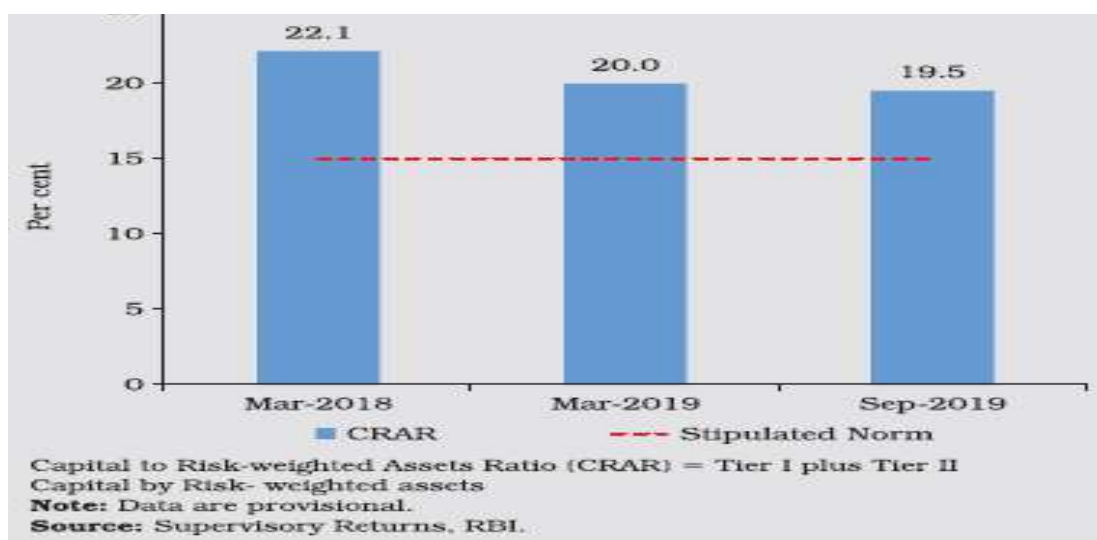

NBFCs depend largely on public funds which accounted for 70% of the total liabilities of the sector. Bank Borrowings, debentures and Commercial Papers (CPs) are the major sources of funding for NBFCs. Bank borrowings have shown an increasing trend as the share of bank borrowing to total borrowings has increased from 21.2% in March 2017 to 29.3% in March 2019. The share of Debentures dropped from 50.2% in March 2017 to 41.5% in March 2019. The CP issuance market witnessed a slow down during the stress period (ILFS Crisis-Sept 2018 to December 2018) on account of the increased spread and cautious approach by banks to subscribe to CPs of NBFCs..

(B) NBFC D:

The funding pattern for NBFC-D is mainly dependent on borrowings from commercial banks (both long term and CPs), debentures (NCDs) and public deposits (PDs). As at September 30, 2019 the Bank Borrowings formed around 50% of the aggregated borrowings from Banks, NCDs and PDs. (Source: Table VI.3 –Abridged Balance Sheets of RBI Report- Trends and Progress of banking in India 2018-19)

Capital Adequacy

NBFCs are generally well capitalized, with the system level capital to risk-weighted assets ratio (CRAR) remaining well above the stipulated norm of 15 per cent. As at September 30, 2019 the NBFC sector's CRAR stood at 19.5% somewhat due to the increase in non-performing assets.

Key indicators of NBFCs:

The key performance indicators of NBFCs for the FY 2017-18, 2018-19 and for 6 months ended September 30, 2019 is set out in the flowing table:

NBFCs' profitability-indicators – returns on equity (RoE) and returns on assets (RoA) – more or less remained at same levels as at 2017-18. The net interest margin (NIM) decreased, reflecting higher interest expenses on account of stress in resource raising in 2018-19. In the case of NBFCs-D, there was improvement in RoA and RoE in 2018-19 on account of robust growth in business. Their NIM also improved, reflecting faster expansion in interest income than that of expenses In 2019-20 so far (up to September), profitability indicators of NBFCs-D showed overall improvements.			

Return on assets (ROA) = Net Profit by Total Assets

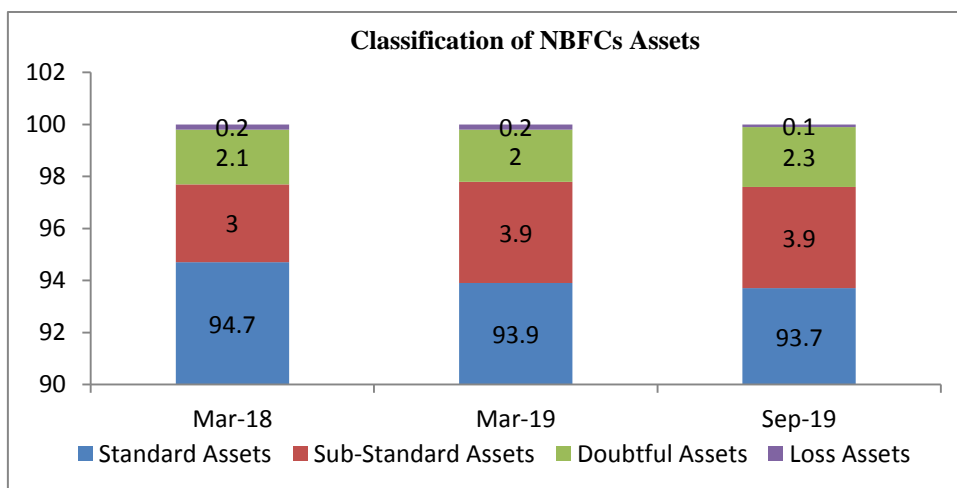

Return on Equity (RoE) = Net Profit by Shareholders' equity

Net Interest Margin (NIM) = Net Interest income by total average assets

Asset Quality of NBFC's

Source: RBI returns as indicated in the Report on Trend & Progress of Banking in India 2018-19

Since November 2014, the asset classification norms of NBFCs have been incrementally aligned with those of banks, leading to higher NPA recognition. During 2017-18, however, there has been an improvement in asset quality, with a part of the portfolio of assets classified as NPAs in 2016-17 being upgraded to standard assets. As a result, both the gross non-performing assets (GNPAs) ratio and the net non-performing assets (NNPAs) ratio declined during 2017-18. In 2018-19, NBFCs registered a deterioration of asset quality. While the gross non-performing assets (GNPAs) ratio increased, net non-performing assets (NNPAs) ratio edged up marginally, reflecting sufficient provisioning. In 2019-20 (up to September), asset quality of the sector showed deterioration with a slight increase in GNPA ratio.

From the above Table, it may be observed that NBFCs-D depend to a large extent on bank credit to fuel their growth.

The Reserve Bank has been striving to wean away NBFCs from collecting public deposits. A revised regulatory framework was issued in November 2014 mandating that only rated NBFCs-D shall accept and maintain public deposits. These guidelines also permitted AFCs to raise public deposits up to a limit of 1.5 times the NOF only, unlike 4 times the NOF allowed earlier.

The assets under management (AUM) in the retail NBFC segment stood at ₹ 9.2 Trillion as at June 2019 registering a YoY growth of 18.5% which is lower than that registered during FY 2018-19. The growth in AUM of retail NBFC was hampered by the weak demand from Vehicle Sector, (50% of retail AUM) LAP and SME (22% of retail AUM) and competitive pressure from the banks in new vehicle and consumer credit business. Banking credit to NBFCs is key to their growth and the same showed slow growth in the back drop of the stress levels faced by the sector in H2 of 2018-19. RBI and GoI continued to take more initiatives in H1 2020 like systemic liquidity infusions and giving priority set or tag to bank credit to NBFCs that on lend to the agriculture, MSME and affordable housing segments. Other initiatives include partial credit enhancement guarantees for PSBs, for purchasing pooled assets from NBFCs and the increase and harmonisation of single borrower NBFC exposure (of banks) with other corporates. These steps augur well for bolstering the credit flow from banks to NBFCs. Anecdotal evidence suggests that much of the incremental credit in the recent past has gone to better rated entities (AA above rated) and entities with good parentage or group support.

NBFCs reduced the dependence on CPs and increased proportion of loan sell downs (through PTCs) and direct assignments (DAs).

The 90+dpd inched up marginally to 4% in June 2019 from 3.9% in March 2019. The asset quality pressure is expected to increase as the credit to some key segments like MSMEs (key targets of NBFCs) slowed down, while the borrowers in other segments, including vehicle finance face a weaker operating environment thereby impacting their cash flow and viability. As per ICRA, there is likely to be continued weakness in the asset quality of NBFCs in the current fiscal (2019-2020).

Due to a skewed write-off and incremental provisioning by a few players, the net profitability of retail NBFCs segment witnessed a dip in Q1 FY 2020 when compared to Q4 FY 2019. ICRA estimates the Return on Managed Assets to improve on the back of the measures to reduce corporate tax rates.

The credit growth in future is expected to remain moderate in FY 2020. The retail NBFCs are expected to register a growth of around 15% to 17% in FY 2020 and the AUM is expected to cross ₹ 10 trillion. The asset quality is expected to face headwinds with some key asset classes (Vehicle and SME segments) likely to witness higher credit quality related pressure.

Outlook for Commercial Vehicles Industry (FY 2020)

The slow-down in the domestic commercial vehicle industry which started from H2 FY 2019, has accentuated in the current fiscal with volumes contracting by a sharp 19% YTD FY 2020. The de-growth has worsened as the year progressed with CV OEMs cutting down their whole sale dispatch by 33% during July August 2019 (as against 10% de-growth in Q1 FY 2020) to pare down inventory levels at dealerships. The slow-down has been significant in M&HCV (truck) segment, wherein volumes contracted by 32% in 5 M FY 2020. This segment has been hit by a double whammy of excess capacity and subdued freight availability. Along with tight liquidity constraints in NBFC space and expecting a GST cut, the fleet operators have deferred their vehicle purchase in the current scenario.

Disbursement Trend of Top 5 CV financiers

Source: ICRA research

The CV segment had an AUM of about ₹ 1000 billion as at June 2019 (almost flat when compared to March 19 data). While there was a substantial dip in the growth of NBFC share in New CV financing, the Used CV segment too witnessed the decline in the growth. As per ICRA report, the positives of revision in Axle norms (July 2018) and implementation of GST and e-way bills was offset by the slowing economic growth and subdued infrastructure activity. Each of the sub segments viz. M&HCV, LCV and Buses too followed similar trends.

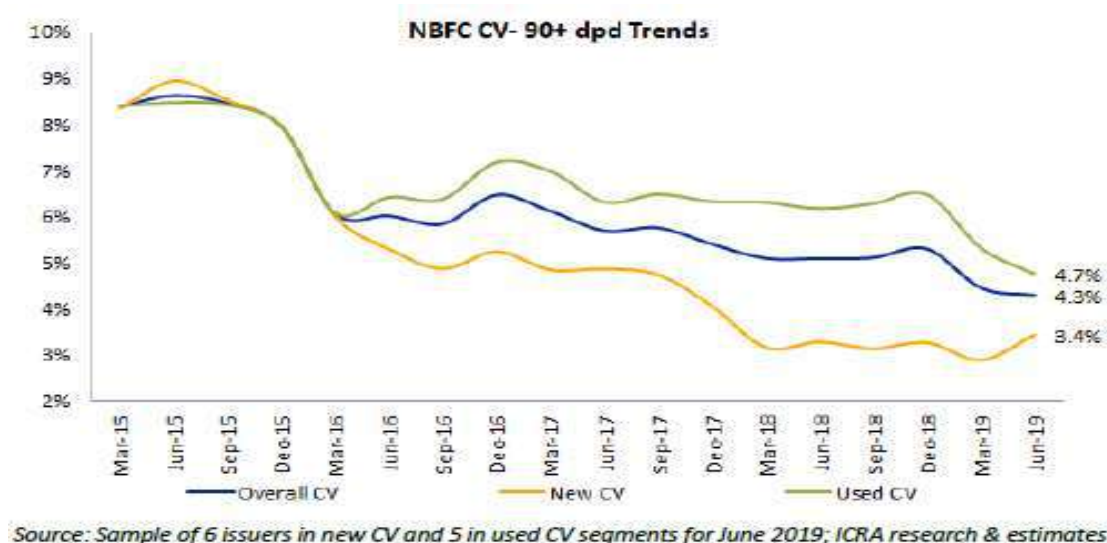

The total NBFC credit to the CV segment stood at ₹ 2.1 trillion as on June 30, 2019 registering a growth of 17% over last year and a modest growth of 2% on QoQ basis.

NBFC credit to the New CV and Used CV segment, both registered a growth of 15% YoY. The last 5 quarters witnessed a range bound trend in disbursement of NBFC credit to the New as also the used CV segment.

ICRA expects the growth in disbursement of NBFC credit to used CV segment to hold at current levels on account of the higher cost of new CVs (due to BS IV norms) and better viability of operations of a used CV in the current subdued demand/ freight rate conditions.

On account of higher interest rates of NBFCs, they are losing out to banks in the market share of AUM of new CVs. The NBFC credit to used CV segment is likely to be driven by the supposedly increased price of new CVs on account of BS VI norms (to be followed from April 2020) which in turn would offer better price for the Used CVs. Further, the banks do not have a substantial

presence in the financing of used CVs. Business yields in the Used CV segments are expected to be in the range of 14% to 20% as against 10~12% for new CVs.

Delinquencies in the CV segment remained stable between Q4 FY 2019 and Q1 FY2020 supported by the Used CV segment's performance. The 90+ dpd for the used CV segment improved to 5.1% in June 2019 from 6.2% in June 2018. The new CV delinquencies remained stable at 3.4% in June 2019 as against 3.3% in June 2018 (2.9% in March 2019)

The pressure on small fleet operators has increased in recent months, with flat freight rates and subdued load availability, while operating costs like insurance, EMIs etc have steadily increased. Any further sharp increase in the fuel price (accounts for 60% of the total operating cost), would impact the margins further. The used CV segment will remain vulnerable to the adverse movement of fuel rates.

ICRA notes that notwithstanding this improvement, the delinquencies are expected to build up slowly considering the cyclical nature of the industry, which is witnessing one of the lowest levels of overdues in the last 4~5 years.

Key Success factors in the used commercial vehicle finance

Valuation	The lack of a transparent pricing mechanism makes valuation a challenge. Good quality appraisers and trained staff, however, can be mitigating factors.
Credit Appraisal	Borrowers often do not have income tax returns or documentation. In addition, 75% of buyers own less than three trucks. Mitigating factors include requiring the personal guarantee of customer and guarantor, checking moveable and immovable property of the customer and the guarantor, and having power of the attorney signed by the customer in the name of the company for repossession in case of default.
Collection Recovery	Since assets and borrowers are both mobile, and 40% to 50% of collection is through cash, collection recovery remains a challenge. Locals who are comfortable dealing with transport operators need to be employed, and collection should multiple times a month.

CONSTRUCTION EQUIPMENT

After witnessing continuous growth during CY 2016, 2017 and 2018, there has been a sharp contraction in the demand for Mining and Construction Equipment in CY 2019 due to the run up to general elections. With formation of a stable Government in May 2019, a revival in demand was expected in Q2 FY 2020, However, the demand remains weak, impacted by the slowing economic growth because of sluggish consumption and investment demand (GDP growth falters to 5% in Q1 FY 2020), weak liquidity and constrained funding etc. ICRA expects the near term demand outlook for CEs to remain negative.

Total NBFC credit to the construction equipment (CE) segment stood at about ₹430 billion as on June 30, 2019, registering an year on year growth of about 9.5% *vis a vis* the 17% growth witnessed in FY 2018. Infrastructure investments in sectors like real estate, roads, irrigation and railways and metro drive demand. The general slow-down of economy, liquidity crunch in the NBFC segment, RERA implementation in real Estate sector have led to a lower growth of CE financing..

Banks, especially private sector banks, offer fine prices and are competitive in this segment; while, NBFCs remained cautious because of the past delinquency build-up in this segment. ICRA expects the NBFC credit to this segment to grow at a8% to 10% in FY 2020. (Source: ICRA Report- Retail- NBFC Credit Trends, October 2019)

OUR STRENGTHS

Unique Business Model

We are an asset finance company with primary focus on financing pre-owned commercial vehicles. Our target customers comprise SRTOs / MRTOs, primarily hailing from rural / semi-urban area. These SRTOs / MRTOs generally find difficulty in obtaining finance from banks on account of their limited credit history and inability to meet the lending covenants of the banks. At the same time, local money lenders offer speedy and flexible finance however at extensively high rate. We identified this opportunity and positioned ourselves between banks and local money lenders to service this population. We have adopted a prompt loan approval and simple documentation procedures, set our offer rates between those of the banks and the money lenders. We believe that we, among the few financial institutions in the organized sector, satisfy the need of the target customers.

Effective origination, credit appraisal and collection processes

We have nearly four decades of experience in asset financing business. We have established an effective process for origination, monitoring and collecting receivables which enabled us to generate the stable growth with control over asset quality.

Our target customers mainly hail from rural / semi-urban area. For such customer segment, the knowledge of local culture and long relationship with the customers play a key role for growth in the operation. We have adopted a distinguished and cost effective business origination policy, where we originate the business through our branch networks in association with marketing officers termed as Customer Service Points (“CSPs”). These CSPs are local residents of the area and have the domain knowledge of that area. They identify potential customers in defined area and maintain long term relationship with the existing customers. Further, this business model also enables us to be proactive and develop future products for our customers. Moreover, we find that the CSP arrangement is cost effective as they function from Small Office Home Office (“SOHO”) provided by our Company without being a formal branch set-up.

We have designed stringent evaluation process and credit policies to ensure the asset quality of our loans and the security provided for such loans. Our credit policy comprises classification of target customers in terms of track record, classification of assets, differentiated loan to value ratio for different class of customers and assets, limits on customer exposure *etc.* Further, in order to build quality assets and reduce NPA level, we have developed a culture of accountability by making our marketing officers responsible for loan administration, monitoring as well as recovery of the loans they originate. With our long-standing understanding and experience in the pre-owned vehicle finance segment, we have developed expertise in valuation of pre-owned vehicles which enables us to accurately determine a recoverable loan amount for commercial vehicle. We believe our Company has established a tested valuation technique for the assets which acts as a crucial entry barrier for others seeking to enter our market segment.

Our entire recovery and collection operation is administered in-house and we do not outsource loan recovery and collection operations. We believe that our loan recovery procedure is particularly well-suited to our target market in the commercial vehicle financing industry, as reflected by our high loan recovery ratios compared to others in the financial services industry, and we believe that this knowledge and relationship based recovery procedure is difficult to replicate in the short to medium term.

Long-standing presence in Southern Regional market

We have been operating in vehicle financing Industry for nearly four decades focusing on Southern part of India particularly in the States of Tamil Nadu and Kerala. We have a network of 49 branches with more than 90% branches located in Tamil Nadu and Kerala. We believe that our continuous focus and presence in the concentrated regional market enabled us to understand customer's requirements and create long and trust-worthy relationship with them by providing quality service and support as per the requirements from proximate locations. At present 50% - 60%, of our total business comes from the existing customers only.

Experienced senior management team

Our Board consists of 8 (eight) Directors, with wide experience in the automotive and/or financial services sectors. Our senior and middle management personnel have extensive experience, expertise and in-depth knowledge of industry. Majority of our senior management team have grown with our Company and have more than 15 years of experience with us. We believe that the industry knowledge and loyalty of our management and professionals provide us with a distinct competitive advantage.

Association with Sakthi Group

We are part of "Sakthi Group" of companies based in Coimbatore, South India. The Sakthi Group is a well-known and reputed Industrial conglomerate having presence in finance, sugar, industrial alcohol, automobile distribution, auto components, dairy, cogeneration, wind energy, transportation, IT Services, education, health-care etc. We benefit from the association with Sakthi Group as it provides us with a large pool of customers who believe and trust Sakthi Group.

Positive long-term industry prospects

The growth momentum in domestic commercial vehicle industry will have direct positive impact on the segment in which we operate. We believe that Commercial Vehicle (CV) industry will find its growth momentum back aided by increased thrust on infrastructure and rural sectors in the recent budget, potential implementation of fleet modernization or scrappage program and higher demand from consumption-driven sectors and e-commerce logistic service providers, especially for LCVs and ICVs. The sustained economic growth, easy availability of finance and subdued interest rates, good monsoon season, government's strong focus on infrastructure development and urban infrastructure, increased freight movement due to the expected increase in activity in sectors such as agriculture, e-commerce, mining etc. are the key factors that will drive growth and expansion of the CV industry in the coming years.

As per ICRA Report, NBFC credit to the new CV segment registered a 20% YoY growth, while the used CV segment grew at a faster pace of about 22%.

BUSINESS STRATEGIES

Expanding our reach in Southern Region of India

We have been operating in commercial vehicle financing segment through our branch network spread mainly in Southern Region of India. At present, we originate 90% of our business from the States of Tamil Nadu and Kerala and balance from other States viz. Karnataka, Andhra Pradesh and Union Territory of Puducherry. We believe that there is still good potential and growth available in Southern Region of India from our existing as well as new customers. We intend to strategically maintain and expand our reach in target market only by establishing additional branches and CSPs in the Southern Region particularly in Tamil Nadu and Kerala. In addition to the States of Tamil Nadu and Kerala, we also intend to gradually explore additional business opportunity in other parts of Southern region. Our customer origination and servicing efforts strategically focus on building long-term relationships with our existing customers and address specific issues in local business requirements of potential customers in the Southern region of India.

Attract and retain talented professionals

We believe that the experience and knowledge of our senior and middle management have played significant role in the growth of our Company. We have been successful in attracting and retaining a team of professionals with experience in credit evaluation, risk management, technology and marketing. We believe, we have created the right balance of performance and other economic incentives for our employees so that they will be motivated to develop business, achieve profitability targets and control risk. We will, from time to time, review our systems and procedures to enable us to respond effectively to changes in the business environment and enhance our overall performance.

Improvement in credit rating to reduce cost of funding

We meet our funding requirements through several sources viz. secured / unsecured non-convertible debentures on private placement basis, fixed deposit from retail investors, terms loan and working capital loan from banks / financial institutions, public issue of non-convertible debenture and private placement of subordinated debt. The RBI vide its circular RBI/2014-15/299 DNBR (PD) CC.No.002/03.10.001/2014-15 dated November 10, 2014 (also mentioned vide RBI's Master Direction

DNBR.PD.002/03.10.119/2016-17 dated August 25, 2016 updated as on November 22, 2019 placed certain restrictions on raising money by NBFCs through private placement in the form of non-convertible debentures and acceptance of fixed deposit. Previous to the RBI Circular, majority of our fund requirements had been met through private placement of non-convertible debentures and fixed deposit from retail investors. Accordingly, in view of the restrictions placed vide RBI circular, we have been concentrating and exploring alternate sources of fund viz. long term loan from banks / financial institution funding or public issue of non-convertible debentures or issue of rated secured/unsecured senior non-convertible debentures on private placement basis. The mobilization of funds from the alternate sources at competitive cost would need to maintain / upgrade the credit rating of our Company. Hence, we intend to improve our credit rating which assists in raising the fund at competitive rate and enhancement in profitability and financial position of the Company.

Upgrade infrastructure and office equipment by incorporating the state of the art information technology system

We believe that information technology is a strategic tool for our business operations to gain competitive advantage and to improve overall productivity and efficiency of the organization. All our technology initiatives are aimed at enhancing our service levels / customer convenience and improving loan administration and recovery while minimizing costs. We continue to implement technology led processing systems to make our appraisal and collection processes more efficient, facilitate rapid delivery of credit to our customers and augment the benefits of our relationship based approach. We believe deployment of strong technology systems enable us to respond to market opportunities and challenges swiftly, improve the quality of services to our customers, and improve our risk management capabilities.

BUSINESS PROCESS

We have classified our business process in three parts as under:

1) Customer Acquisition and Retention (CARE)

We primarily focus on soliciting new customers in target business segment as well as retaining existing customers. We originate our business through our branch network and marketing officers known as Customer Service Point (“CSP”). As on the date of Prospectus, we have network of 49 branches located in the States of Tamil Nadu, Kerala, Karnataka, Andhra Pradesh and Union Territory of Puducherry. Each of our branch has 3-4 CSPs. The CSPs are marketing officers belonging to local residence having the domain knowledge of that area which enable us in acquiring and retaining of customers. This will facilitate faster credit delivery to customer and maintain good relationship with customers. The CSPs identify the business opportunity in terms of business policy of the Company and link the same to the branch concerned for further process.

Origination: We have developed effective sourcing and customer origination initiatives specifically targeted at SRTOs / MRTOs through establishing connection with various transport and other associations for procurement of database for scouting the new customers, publishing advertisements in print media and conducting the road show in the target market. Further, our existing customers/guarantors are also good source of business generation. We develop and maintain long-term personalized relationship with our existing customers, which enable us to generate business from same customers or through referral business.

2) Customer Appraisal Process (CAP)

On identifying suitable opportunity, the CSPs report the same to the branch concerned for pre-appraisal process along with necessary documents and information. The CSPs and the cluster head / branch manager pre-appraise the business proposal in terms of the credit policy of the Company and verify customer profile, credit history, vehicular records, value of vehicle and KYC documents. They also conduct visit and inspect the vehicle, take chassis number pencil print / photo to determine genuineness and value of the asset to be financed.

The branch sends the proposal / report and recommendation along with all physical documents including inspection report to the credit appraisal team at Head Office. The appraisal process is centralized at Head Office and all the branches are linked through web which expedites appraisal process. The credit appraisal team examines independently profiles of all intended borrowers / guarantors, capacity and intention to repay the loan, vehicle inspection report and other relevant documents. External and Internal Dedupe Checks form part of our appraisal. Grading of Customers	We segregate the eligible target customers into three categories on the basis of their credit track record viz. We adopt very stringent credit criteria with respect to Loan to Value ratio, interest rate, guarantors etc. Further our credit policy categorise customers as First Time Customer (FTC) who are new entrants. The exposure limit and loan to value ratio, depend upon category of customers.
Differentiable Loan to Value (LTV) Ratio	As a part of Credit Policy, we have pre-determined market value matrix for all eligible assets (including commercial / constructions / infrastructure vehicles). Further, we reckon customer category i.e. ETR / GTR / ATR, to arrive Loan to Value ratio. Further, our Credit Policy stipulates strict criteria of Loan to Value ratio for customer's categories under first time use funding policy. For arriving at valuation matrix, we follow the basis viz. (i) Market value as gathered from peers in the industry, sales details, etc., (ii) Opinion from authorized valuer for unregistered, non-routine assets, (iii) Insured Declared Value for registered/ unregistered, non-routine assets and (iv) Market value of the vehicles can be approved / altered, if required, within the financial year after getting approval from the Credit Committee.
Defined Geographical Concentration	As per the Policy, the Company will focus on the 4 Southern States i.e. Tamil Nadu, Kerala, Karnataka and Andhra Pradesh. The Policy also stipulates volume of business from each State and concentration of sector in respect of each State viz. transport, construction equipment agriculture and others. We stipulate exposure in terms of Loan to Value (LTV) percentage of the asset on the basis of customer profile, repayment culture and other relevant factors. Lending to single borrower is linked to profile, span of relationship, repayment culture and inherent strength of the customer / group. Lending to single borrower is restricted to 15% of net owned funds of the Company or 25% to single group of borrowers. We have delegated sanctioning power to various grades of sanctioning authority depending upon the exposure to a particular customer / group. The borrower is provided with a copy of the loan documents / agreements executed by him. Although our customers have the option of making payments by cash or cheque, we may require the applicant to submit ECS mandate and bank details prior to any loan disbursement. For used vehicles, an endorsement on the registration certificate as well as the insurance policy must be executed in our favour.

3) *Customer and Asset Management Process (CAMP)*

The critical success factor of an NBFC is its ability to manage the advance portfolio and recover the money lent on due dates. There is a team at Head Office, which continuously monitor the recovery and offers support to branches and CSPs on exceptional accounts which pose collection problems.

The loan documentation, administration and monitoring plays a crucial role in maintaining asset quality by initiating desirable action at appropriate time. On intimation of sanctioning the finance, branch concerned takes care of execution of loan agreement / hire purchase agreement with the borrower and guarantor and other relevant documents. The loan repayment schedule is attached to the agreement. We hand over a copy of loan agreement / hire purchase agreement, repayment schedule and terms and conditions of hire purchase agreement to customers for their record. As a service to our customers, the CSP offers to visit the customers on the payment date to collect the instalments due. We monitor the track record of our customers regularly on monthly basis covering outstanding tenure and amount of loan, number of instalments due and default committed.

With view to enhance the operational efficiency, we have clearly defined area as well as limit on number of loan accounts to be evaluated and monitored by each branch office and CSP. Each branch operates within the radius of 100 km and CSP operates within a radius of 40 km under the relevant branch jurisdiction. Each branch administers and monitors 500 to 1000 accounts. Each CSP administers and monitors 150 to 250 customers and in the event of a CSP reaching the mark of 150 customers, we provide the assistance of one or two support officers, depending upon the number of further accounts operated by him to assist in the loan monitoring process. Once a CSP reaches the level of 300 customers mark, the CSP is converted into a full-fledged Branch with necessary infrastructure and information system.

We have also clearly defined authority level to monitor in the event of delay in making the payment of loan instalments. For instances, any delay between (a) 30-90 days monitored by branch manager (b) 90-180 days by collection specialists (c) 180-270 days by CAMP officer and (d) more than 270 days by the Head Office through its CAMP department and legal department.

Collection and Recovery

In case of delay in payment, we personally visit the customer place, interact and find out the reason for delay and genuineness. In case, we are satisfied with the difficulty of customer, we restructure the loan payment schedule accordingly. We also issue notice to the customers as well as guarantors about delay in making payment. In the event of delay or non-payment of dues, we repossess the vehicle and liquidate the same and recover balance outstanding dues. If the amount recovered from liquidating vehicle is not sufficient to clear our dues, we take legal recourse against the borrowers and guarantors.

WINDMILL OPERATION

In addition to finance business, we generate power from windmills and sell the same to Tamil Nadu Electricity Board and Gujarat Urja Vikas Nigam Limited. We have evolved a strong, integrated and comprehensive risk-assessment process which has resulted in stable growth with good asset quality. We have established Risk Management Committee which reviews risk management policy developed by the management reviews the annual risk management framework document and periodically reviews the process for systematic identification and assessment of the business risk. We also periodically monitor the critical risk exposure and report to the board the details of any significant developments and make recommendations to the Board on need basis for effective risk management. The key risks and risk mitigation process we apply to address these risks are summarized below:

Market Risk : Interest Rate Risk and Liquidity Risk

Interest Rate Risk

Our Company's assets and liabilities consist of items sensitive to re-pricing as well as non-sensitive items. The difference between interest rate sensitive assets and liabilities affect net interest margin or net interest income. Net interest income is the difference between our interest income and interest expense. Since our balance sheet consists of rupee assets and rupee liabilities, movements in domestic interest rates constitute the primary source of interest rate risk. We assess and manage the interest rate risk on our balance sheet through the process of asset liability management. We borrow funds at fixed and floating rates of interest, while we extend credit at fixed rates. In the absence of proper planning and in a market where liquidity is limited, our net interest margin may decline, which may impact our revenues and ability to exploit business opportunities. We have developed stable and long-term relationships with our lenders, and established a track record of timely servicing of our debts. This has enabled us to become a preferred customer with most of the major banks and financial institutions with whom we do business. An interest rate gap statement is prepared by classifying assets and liabilities into various time period categories according to contracted maturity on monthly basis. The difference between the amount of assets and liabilities maturing would give an indication of the extent of exposure to the risk of potential changes in the margin. Based on the above, ALCO would propose

for a pricing of products including sources of funds. Moreover, our valuation capabilities enable us to invest in good quality assets with stable, attractive yields.

Liquidity Risk

Measuring and managing liquidity needs are vital for effective operation of company. Liquidity risk arises due to non-availability of adequate funds or non-availability of adequate funds at an appropriate cost or of appropriate tenor, to meet our business requirements. We actively monitor our liquidity position and attempt to maintain adequate liquidity at all times to meet all requirements of all depositors and debenture holders while also meeting the requirements of lending. We prepare maturity gap analysis to review the liquidity position. Dynamic analysis is also done to enable requirement of liquidity for short term fund requirement. Further, we have developed expertise in mobilizing long-term and short-term funds at competitive interest rates, according to the requirements of the situation. As a matter of practice, we generally do not deploy funds raised on short term borrowing for long-term lending.

For management of interest rate risk and liquidity risk, the Board has constituted an Asset Liability Management Committee (“ALCO”). The primary objective of ALCO is to review at periodic intervals the liquidity risk, interest rate risk sensitivity and the pricing of various products of our Company.

Credit Risk

Credit risk is the risk of loss that may occur from the default by our customers under the loan agreements with us. As stated above, borrower defaults and inadequate collateral may lead to higher NPAs. We minimize credit risk by requiring that each loan must be guaranteed by another commercial vehicle operator in the same locality as the borrower, preferably by an existing or former borrower. Furthermore, we lend on a relationship based models and our loan recovery ratios indicate the effectiveness of this approach for our target customer base. We also employ advanced credit assessment procedures, which include verifying the identity and checking references of the proposed customer thoroughly at the lead generation stage. Our extensive regional presence also enables us to maintain regular direct contact with our customers. In this regard, we assign personal responsibility to each member of the lead generation team for the timely recovery of the loans they originate, closely monitoring their performance against our Company's standards, and maintain client and vehicles-wise exposure limits. The company has an effective post sanction monitoring process- supervision and follow-up to identify credit portfolio trends and early warning signals. This enables to implement necessary changes to the credit policy, whenever the need arises.

Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people or systems or from external events. The operational risks are managed through comprehensive internal control systems and procedures and key back-up processes. We have evolved a system of submission of exceptional reports for procedural lapses at the branches level, risk-based audits on a regular basis across all business units/functions and IT disaster recovery plans for evaluating key operational risks.

Cash Management Risk

Our Head Office and branch offices collect and manage large volume of cash of customers' payments. Lack of proper cash management practices could lead to losses. To address cash management risks, our company has formulated a cash management policy with an object to establish proper systems and procedures, safety and security in relation to cash management of the company at our head office and branches. The policy covers activities like custody of cash and other valuables during business hours and overnight as also while in transit, custody of its keys / duplicate keys, adequacy of insurance over its property, cash retention limit and system of monitoring, security arrangements, systems in place to deal with theft / robbery etc. The collection of cash is made through ERP, if the cash is collected at the branch and using hand-held device if the cash is collected in the field. In case of hand-held devices, the receipts issued are to be transferred to S3G (system for advances) application server maintained at Head Office immediately and the collection staffs are advised to deposit the cash collection into our company's bank account either on the same day or on the next working day. In case cash is not deposited on the same day, it is to be reported to the senior executives at Head Office by way of auto generated system report, who regularly monitor the collections and remittance of cash on daily basis. Our company has also put limit on acceptance of cash in aggregate from a person in a day, in respect of a single transaction and in respect of transactions relating to one event or occasion from a person. Further, we conduct regular audits to ensure the highest levels of compliance with our cash management systems.

Reputational Risk

The Reputation risk arises from the negative public opinion. Such type of risk may arise from the failure to assess and control compliance risk and can result in harm to existing or potential business relationships. We continually solicit feedback from employees and customers on issues concerning the image of the company and negative public opinion, if any, address on priority basis.

Regulatory and Compliance Risk

Regulatory and compliance risk are the risks to earnings or capital arising from violations of, or non-conformance with, laws, rules, regulations, prescribed practices, internal policies, and procedures, or ethical standards. The regulatory and compliance risk will also be result of any changes made in laws, rules or regulations to comply with. There may some differences in interpretation of regulations by the company *vis-à-vis* that of the regulators. Our Company adopted a watch dog approach in the system ensuring compliance of laws and regulations by risk management on an on-going basis and ensuring timely submission of periodical reports to regulatory authorities is put in place to avoid legal/compliance risk. Further, our Company has engaged experienced professionals in different departments in order to take care of compliance with the applicable laws, rules and regulations and guidelines affecting company's business. Our Company also takes advice from reputed external consultants in respect to the laws, rules or regulations affecting the company's business.

Since success of our operation primarily depends on closeness with our customers, we prefer to hire our workforce from the locality in which they will operate, in order to benefit from their knowledge of the local culture, language, preferences and territory. Further, since our marketing officers are responsible for customer origination, loan administration and monitoring as well as loan recovery it enables them to develop strong relationships with our customers.

Our organizational structure relies on efficient communication and feedback system. We evaluate the performance of our employees at regular interval in line with target allocated to them. We provide a performance-based monetary as well as non-monetary incentive to the employees along with progressive career path. Intellectual Property

We have made an application for registration of our logo with Registrar of Trademarks, Chennai, Tamil Nadu, which is pending for registration. However, we use this  as logo, which is not yet registered under Trade Marks Act, 1999, till date.

COMPETITION

We are an asset finance company with primary focus on financing pre-owned commercial vehicle and our target customers comprise SRTOs / MRTOs. In this segment, we primarily face the competition from the private unorganized financiers that principally operate in the local market. Unorganized players cater to the bulk of demand for pre-owned truck financing. These unorganized players have significant local market expertise, but lack brand image and organizational structure. The small private financiers also have limited access to funds and may not be able to compete with us on interest rates extended to borrowers, which we are able to maintain at competitive levels because of our access to a variety of comparatively lower cost funding sources and operational efficiencies from our scale of operations. However, private operators may attract certain clients who are unable to otherwise comply with our loan requirements, such as the absence of an acceptable guarantor or failure of the commercial vehicle to meet our asset valuation benchmarks.

Organized players like Banks and larger NBFCs are entering this refinance business. However most of our customers are not a focus segment for banks or large NBFCs, as these customers lack substantial credit history and other financial documentation on which many such financial institutions rely to identify and target new customers. Even though more NBFCs are entering into this segment, we believe that only NBFCs with good network of field staff, effective relationship management and customer evaluation tools can succeed in this business. Our long presence in the segment with experience-based valuation methodology, growing customer base and relationship-based approach are key competitive advantages against new market entrants.

The Registrar to the Issue will undertake technical rejections based on the electronic details and the Depository database and prepare list of technical rejection cases. In case of any discrepancy between the electronic data and the Depository records, our Company, in consultation

with the Designated Stock Exchange, the Lead Manager and the Registrar to the Issue, reserves the right to proceed as per the Depository records for such Applications or treat such Applications as rejected.

Based on the information provided by the Depositories, our Company shall have the right to accept Applications belonging to an account for the benefit of a minor (under guardianship).

In case of Applications for a higher number of NCDs than specified for that category of Applicant, only the maximum amount permissible for such category of Applicant will be considered for Allotment.

Basis of Allotment for NCDs

a. Basis of Allotment for NCDs

The Registrar will aggregate the Applications, based on the applications received through an electronic book from the Stock Exchange and determine the valid Application for the purpose of drawing the basis of allocation.

b. Grouping of Applications and Allocation Ratio:

Applications received from various applicants shall be grouped together on the following basis:

- (i) Applications received from Category I applicants: Applications received from Category I, shall be grouped together (**“Institutional Portion”**);
- (ii) Applications received from Category II applicants: Applications received from Category II, shall be grouped together (**“Non-Institutional Portion”**); and
- (iii) Applications received from Category III applicants: Applications received from Category III, shall be grouped together (**“Retail Individual Portion”**)

For removal of doubt, **“Institutional Portion”**, **“Non-Institutional Portion”** and **“Retail Individual Portion”** are individually referred to as **“Portion”** and collectively referred to as **“Portions”**.

For the purposes of determining the number of NCDs available for allocation to each of the above mentioned Portions, our Company shall have the discretion of determining the number of NCDs to be allotted over and above the Base Issue Size, in case our Company opts to retain any oversubscription in the Issue up to ₹ 20,000 lakhs. The aggregate value of NCDs decided to be allotted over and above the Base Issue Size, (in case our Company opts to retain any oversubscription in the Issue), and/or the aggregate value of NCDs up to the Base Issue Size shall be collectively termed as the **“Overall Issue Size”**.

c. Allotment in the First Instance

The registrar will aggregate the applications based on the applications received through an electronic book from the stock exchange and determine the valid applications for the purpose of drawing the basis of allocation. Grouping of the application received will then be done in the following manner:

- (i) Applicants belonging to the Category I, in the first instance, will be allocated NCDs upto 5% of Overall Issue Size on first come first serve basis;
- (ii) Applicants belonging to the Category II, in the first instance, will be allocated NCDs upto 5% of Overall Issue Size on first come first serve basis;
- (iii) Applicants belonging to the Category III, in the first instance, will be allocated NCDs upto 90% of Overall Issue Size on first come first serve basis;

Allotments, in consultation with the Designated Stock Exchange, shall be made on a first-come first-serve basis, based on the date of upload of each application into the electronic book with Stock Exchange, in each Portion subject to the Allocation Ratio.

As per the SEBI Circular dated October 29, 2013, the allotment in the Issue is required to be made on the basis of date of upload of each application into the electronic book of the Stock Exchange. However, on the date of oversubscription, the allotments should be made to the applicants on proportionate basis.

- a. Under Subscription:** If there is any under subscription in any Category, priority in Allotments will be given to the Individual Portion, and balance, if any, shall be first made to applicants of the Non-Institutional Portion, followed by the Institutional Portion on proportionate basis, on a first come first serve basis.
- b.** For each Portion, all applications uploaded into the Electronic Book with Stock Exchange would be treated at par with each other. Allotment within a day would be on proportionate basis, where NCDs applied for exceeds NCDs to be allotted for each Portion respectively.
- c.** Minimum allotments of (1) one NCDs and in multiples of (1) one NCDs thereafter would be made in case of each valid application.
- d. Allotments in case of over-subscription:** In case of an oversubscription, allotments to the maximum extent, as possible, will be made on a first come first-serve basis, i.e. full allotment of NCDs to the applicants on a first come first basis for forms uploaded upto 5 p.m. on the date falling 1 (one) day prior to the date of oversubscription and thereafter on proportionate basis

to the applicants on the date of oversubscription (based on the date of upload of the Application on the Stock Exchange Platform, in each Portion). In case of over subscription on the date of opening of the Issue, the Allotment shall be made on a proportionate basis. In view of the same, the Investors are advised to refer to the Stock Exchange website at www.bseindia.com for details in respect of subscription.

e. Proportionate Allotments: For each portion, on the date of over-subscription:

- (i) Allotments to the applicants shall be made in proportion to their respective application size, rounded off to the nearest integer;
- (ii) If the process of rounding off to the nearest integer results in the actual allocation of NCDs being higher than the Issue Size, not all applicants will be allotted the number of NCDs arrived at after such rounding off. Rather, each applicant whose allotment size, prior to rounding off, had the highest decimal point would be given preference; and
- (iii) In the event, there are more than one Applicant whose entitlement remain equal after the manner of distribution referred to above, our Company will ensure that the basis of allotment is finalised by draw of lots in a fair and equitable manner.

All decisions pertaining to the Basis of Allotment of NCDs pursuant to the Issue shall be taken by our Company in consultation with the Lead Manager and the Designated Stock Exchange and in compliance with the aforementioned provisions of the Prospectus.

f. Applicant applying for more than one Options of NCDs

If an Applicant has applied for more than one Options of NCDs and in case such Applicant is entitled to allocation of only a part of the aggregate number of NCDs applied for due to such applications received on the date of over-subscription, the option-wise allocation of NCDs to such Applicants shall be in proportion to the number of NCDs with respect to each Options, applied for by such Applicant, subject to rounding off to the nearest integer, as appropriate in consultation with the Lead Manager and the Designated Stock Exchange.

In cases of odd proportion for allotment made, our Company in consultation with the Lead Manager will allot the differential one NCD in the following order:

- (i) first with monthly interest payment in decreasing order of tenor *i.e.* Options I, III, VI and IX
- (ii) followed by annual interest payment maturity options in decreasing order of tenor *i.e.* Options IV, VII, and X and

Hence using the above procedure, the order of allotment for the residual NCD (s) will be Options I, II, III, IV, V, VI, VII, VIII, IX, X and XI.

Valid applications where the Application Amount received does not tally with or is less than the amount equivalent to value of number of NCDs applied for, may be considered for Allotment, to the extent of the Application Amount paid rounded down to the nearest ₹ 1,000 in accordance with the pecking order mentioned above.

(I) Laws in relation to Non-Banking Financial Companies

(A) The Reserve Bank of India Act, 1934 (the “RBI Act”)

The RBI is entrusted with the responsibility of regulating and supervising the activities of NBFCs under the RBI Act. The RBI Act defines an NBFC as:

- i. a financial institution which is a company;
- ii. a non-banking institution which is a company and which has as its principal business of receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner; or
- iii. such other non-banking institution or class of such institutions as the RBI may, with the previous approval of the Central Government and by notification in the official gazette, specify.

As per the RBI Act, a financial institution is a non-banking institution, carrying on as whole or part of its business, *inter alia*, the financing of activities other than its own, by making loans, advances or otherwise; the acquisition of shares, stock, bonds, debentures, securities issued by the Government or other local authorities or other marketable securities of like nature or letting or delivering goods to a hirer under a hire-purchase agreement.

The RBI has, through a press release dated April 8, 1999, clarified that in order to identify a particular company as an NBFC, it shall consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide its principal business. A company shall be treated as an NBFC, if its financial assets are more than 50% of its total assets (netted off by intangible assets) and income from financial assets is more than 50% of its gross income. Both these tests are required to be satisfied as the determinant factors for principal business of a company.

NBFCs are not permitted to commence or carry on the business of a non-banking financial institution without obtaining a certificate of registration (“CoR”) from the RBI. Further, every NBFC is required to submit to the RBI a certificate from its statutory auditor within one month from the date of finalization of its balance sheet, and in any case not later than December 31st of that year, stating that it is engaged in the business of non-banking financial institution requiring it to hold a CoR. The RBI Act makes it mandatory for every NBFC to get itself registered with the RBI in order to be able to commence any of its activities.

An NBFC may be registered as a deposit-accepting NBFC (“NBFC-D”) or as a non-deposit accepting NBFC (“NBFC-ND”). Our Company has been classified as a systemically important **NBFC-D SI**.

RBI by circular DNBR(PD) CC.No.097/03.10.001/2018-19 dated February 22, 2019, has harmonized different categories of NBFCs into fewer ones, based on the principle of regulation by activity rather than regulation by entity. Accordingly, RBI has merged the three categories of NBFCs, namely Asset Finance Companies, Loan Companies and Investment Companies into a new category called NBFC-Investment and Credit Company. (NBFC-ICC). Further, a deposit taking NBFC-ICC shall invest in unquoted shares of another company which is not a subsidiary company or a company in the same group of the NBFC an amount not exceeding 20% of its owned funds. Prior to this reclassification, our Company was classified as an Asset Finance Company.

(B) Regulatory Requirements of an NBFC under the RBI Act

(i) Net Owned Fund

The RBI Act, read with a RBI notification dated April 20, 1999, provides that to carry on the business of an NBFC, an entity would have to be registered as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹ 200 lakh. For this purpose, the RBI Act has defined ‘net owned fund’ to mean:

- i. the aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance sheet of the company, after deducting:
 - a. accumulated balance of losses,
 - b. deferred revenue expenditure;
 - c. deferred tax asset(net) and
 - d. other intangible assets;
- ii. further reduced by the amounts representing:
 - a. investment by such companies in shares of: (a) its subsidiaries, (b) companies in the same group, and (c) other NBFCs; and
 - b. the book value of debentures, bonds, outstanding loans and advances (including hire purchase and lease finance) made to, and deposits with (a) subsidiaries of such company; and (b) companies in the same group, to the extent such amount exceeds 10% of (i) above.

(ii) Reserve Fund

In addition to the above, the RBI Act requires NBFCs to create a reserve fund and transfer therein a sum of not less than 20% of its net profits earned annually, as disclosed in the profit and loss account, before declaration of dividend. Such sum cannot be appropriated by the NBFC except for the purposes specified by the RBI from time to time and every such appropriation is required to be reported to the RBI within 21 days from the date of such withdrawal.

(iii) Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 2016 dated August 26, 2016 and amended from time to time ("Deposit Directions")

Our Company has been classified as a Deposit-Taking Non-Banking Asset Finance Company and accordingly we are regulated by the Deposit Directions in respect of taking deposits. As per the above Direction, every NBFC-D, shall invest and continue to invest in India in unencumbered approved securities valued at the price not exceeding the current market price of such securities an amount which shall, at the close of business or any day, not be less than 15% of the "public deposit", as defined under sub-paragraph (xv) of paragraph of applicable Deposit Directions, outstanding at the close of business on the last working day of second preceding quarter and further can invest not less than 10% in unencumbered approved securities and the remaining in unencumbered term deposits in any scheduled commercial bank / bonds of SIDBI / NABARD, the aggregate of which shall not be less than 15% of the public deposit outstanding at the last working day of the second preceding quarter. The Deposit Directions further, places the following restrictions on NBFCs-D in connection with accepting public deposits:

- a) **Prohibition from accepting any demand deposits:** NBFCs are prohibited from accepting any public deposit which is repayable on demand.
- b) **Ceiling on quantum of deposits:** An asset finance company or a loan company or an investment company or a factor (a) having minimum NOF as stipulated by RBI, and (b) complying with all the prudential norms, may accept or renew public deposit, together with the amounts remaining outstanding in the books of the company as on the date of acceptance or renewal of such deposit, not exceeding one and one-half times of its NOF. Provided that an asset finance company holding public deposits in excess of the limit of one and one-half times of its NOF shall not renew or accept fresh deposits till such time they reach the revised limit.
- c) **Prohibition from accepting any deposits from NRIs:** NBFCs are also prohibited from inviting or accepting or renewing repatriable deposits, from Non- Resident Indians under the Non-Resident (External) Account Scheme, at a rate exceeding the rate specified by the RBI for such deposits with Scheduled Commercial Banks (the period of repatriable deposits shall be not less than one year and not more than three years).
- d) **Credit-rating:** In the event that the credit rating issued by a credit rating agency recognized by RBI, for an asset finance company, is downgraded below the minimum specified investment grade, with respect to the relevant credit rating agency, the NBFC must (a) forthwith stop accepting public deposits, (b) report the position of the credit rating within fifteen working days to the RBI and (c) reduce, within three years from the date of such downgrading of credit rating, the amount of excess public deposits to nil or the appropriate extent as permitted under the Deposit Directions, by repayment as and when such deposit falls due or otherwise.
- e) **Ceiling on rate of interest:** An NBFC cannot invite or accept or renew public deposit at a rate of interest exceeding twelve and half per cent per annum. Such interest may be paid or compounded at rests which shall not be shorter than monthly rests.
- f) **Minimum lock-in period:** An NBFC is prohibited from granting any loan against a public deposit or make premature repayment of a public deposit within a period of three months from the date of acceptance of such public deposit.
- g) **NBFC failing to repay public deposit prohibited from making loans and investments**
A NBFC-D which has failed to repay any public deposit or part thereof in accordance with the terms and conditions of such deposit, cannot grant any loan or other credit facility by whatever name called or make any investment or create any other asset as long as such default exists.

(iv) **Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016 vide DNBR.PD.008/03.10.119/2016-17 September 01, 2016 (updated as on November 22, 2019) ("NBFC- SI Directions")**

- (a) **Capital Adequacy:** Every Systemically Important NBFC shall maintain a minimum capital ratio consisting of Tier I and Tier II Capital which shall not be less than 15% of its aggregate risk weighted assets on-balance sheet and of risk adjusted value of off-balance sheet items and the Tier I Capital in respect of applicable NBFCs (other than NBFC-MFI and IDF-NBFC), at any point of time, shall not be less than 10%. For the above, 'Tier I Capital' means owned fund as reduced by investment in shares of other non-banking financial companies and in shares, debentures, bonds, outstanding loans and advances including hire purchase and lease finance made to and deposits with subsidiaries and companies in the same group exceeding, in aggregate, ten per cent of the owned fund; and perpetual debt instruments issued by a non-deposit taking non-banking financial company in each year to the extent it does not exceed 15% of aggregate of Tier I Capital of such company as on March 31 of the previous accounting year. Further "Tier II Capital" means (a) preference shares not compulsorily convertible into equity; (b) revaluation reserves at a discounted rate of 55%; (c) general provisions and loss reserves, to the extent these are not attributable to an actual diminution in value or identifiable potential loss in any specific asset, and are available to meet unexpected losses, to the extent of 1.25% of risk weighted assets; (d) hybrid debt capital instruments; (e) subordinated debt and (f) perpetual debt instruments issued by a non-deposit taking non-banking financial company which is in excess of what qualifies for Tier I Capital. At any given time, "Tier II Capital" shall not exceed the total "Tier I Capital" of an NBFC.
- (b) **Prudential Requirements:** The NBFC-SI Directions place several requirements that an NBFC must adhere to, *inter alia*, regarding income recognition, income from investments, the need to follow relevant accounting standards, the framing and implementation of an investment policy amongst others.
- (c) **Loan Policy:** As per the NBFC-SI Directions, the Board of Directors granting / intending to grant demand / call loans shall frame policy for the NBFC which includes, *inter alia*, a cut-off date within which the repayment of demand or call loan shall be demanded or called up and the rate of interest which shall be payable on such loans.

(d) **Non-Performing Assets ("NPAs")**

Under the NBFC-SI Directions, the following shall be considered as 'non-performing assets' ("NPAs"), if the accompanying conditions remain in existence for a period of three months or more for Fiscal 2019:

- i. Assets, in respect of which interest has remained overdue;
- ii. Term loans, inclusive of unpaid interest, when the instalment is overdue, or on which interest amounts remain overdue;
- iii. Demand or call loans, which has remained overdue, or on which interest amount remained overdue;
- iv. Bills, which have remained overdue;
- v. Interest in respect of a debt or income on receivables under the head 'other current assets,' being in the nature of short term loans / advances, which have remained overdue; or
- vi. any dues on account of the sale of assets or services rendered, or reimbursement of expenses incurred, which have remained overdue.

Lease rental and hire purchase instalments shall be considered as NPAs if they remain overdue for three months or more in Fiscal 2019. In addition, where any of the above are classified as NPAs in relation to a borrower, the balance amount outstanding under other all credit facilities extended to them are also classified as NPAs. In terms of the NBFC-SI Directions, any income – including interest, discount, hire charges, lease rentals or other charges on an NPA shall be recognised as 'income' only when it is actually realised.

(e) **Exposure Norms:**

In order to ensure better risk management and avoidance of concentration of credit risks, the RBI has, in terms of the Master Direction, prescribed credit exposure limits for financial institutions in respect of their lending to single/group borrowers. Credit exposure to a single borrower shall not exceed 15 per cent of the owned funds of the systemically important NBFC-ND/D, while the credit exposure to a single group of borrowers shall not exceed 25 per cent of the owned funds of the systemically important NBFC-ND/D. Further, the systemically important NBFC-ND/D may not invest in the shares of another company exceeding 15 per cent of its owned funds, and in the shares of a single group of companies exceeding 25 per cent of its owned funds. However, this prescribed ceiling shall not be applicable on a NBFC-ND/D-SI for investments in the equity capital of an insurance company to the extent specifically permitted by the RBI. Any NBFC-ND/D-SI not accessing public funds, either directly or indirectly, may make an application to the RBI for modifications in the prescribed ceilings. Any systemically important NBFC-ND/D classified as asset finance company by RBI may, in exceptional circumstances, exceed the above ceilings by 5 per cent of its owned fund, with the approval of its Board of Directors.

The loans and investments of the systemically important NBFC-ND taken together may not exceed 25 per cent of its owned funds to or in single party and 40 per cent of its owned funds to or in single group of

parties. A systemically important ND-NBFC may, make an application to the RBI for modification in the prescribed ceilings. Further, NBFC ND SI may exceed the concentration of credit/investment norms, by 5 per cent for any single party and by 10 per cent for a single group of parties, if the additional exposure is on account of infrastructure loan and/or investment. All NBFCs are required to frame a policy for demand and call loan that includes provisions on the cut-off date for recalling the loans, the rate of interest, periodicity of such interest and periodical reviews of such performance. The prudential norms also specifically prohibit NBFCs from lending against its own shares. Net Owned Fund Section 45-IA of the RBI Act provides that to carry on the business of a NBFC, an entity would have to register as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹ 200 lakh.

(f) Asset Classification

The NBFC-SI Directions require that every NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

- i. Standard assets, i.e. assets, in respect of which, no default in repayment of principal or interest is perceived, which do not disclose any problems and do not carry more than a normal risk attached to business;
- ii. Sub-standard assets, i.e. assets which have been classified as NPAs for a period not exceeding 12 months, or where the terms regarding repayment of the payment or interest have been renegotiated, rescheduled or restructured, until satisfactory performance of the revised terms for a year;
- iii. Doubtful assets, i.e. term loans, lease assets, hire-purchase assets or any other asset that has remained substandard for a period exceeding 12 months; and
- iv. Loss assets, i.e. assets that have been identified as such by the NBFC, its internal or external auditors, or the RBI during its inspection of the NBFC, to the extent that it has not been written off by the NBFC, or assets adversely affected by the threat of non-recoverability due to the erosion in the value of the security, non-availability of security or a fraudulent act or omission by the borrower.

Further, such class of assets would not be entitled to be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for such upgradation.

(g) Provisioning Requirements

An NBFC-SI, after taking into account the time lag between an account becoming an NPA, its recognition, the realisation of the security and erosion over time in the value of the security charged, shall make provisions against sub-standard assets, doubtful assets and loss assets in the manner provided for in the NBFC-SI Directions as per details given below:

- i. Loss Assets: The entire assets shall be written off, and if they are permitted to remain in the books of the NBFC, 100% of the outstanding loss assets shall be provided for.

(vi) Laws in relation to the recovery of debts

(a) Insolvency and Bankruptcy Code, 2016 (the “IB Code”)

The IB Code primarily enables time-bound reorganisation and insolvency resolution of debtors. The primary objectives of the IB Code are:

- i. to consolidate and amend the laws relating to reorganisation and insolvency resolution of corporate persons, partnership firms and individuals in a time-bound manner for maximisation of value of assets of such persons;
- ii. to promote entrepreneurship, availability of credit and balance the interests of all the stakeholders, including alteration in the order of priority of payment of Government dues; and
- iii. to establish an Insolvency and Bankruptcy Board of India.

The IB Code specifies two different sets of adjudicating authorities to exercise judicial control over the insolvency and liquidation processes:

- i. In case of companies, limited liability partnerships and other limited liability entities, National Company Law Tribunals (“NCLT”) shall act as the adjudicating authority; and appeals therefrom shall lie with the National Company Law Appellate Tribunal (“NCLAT”).
- ii. In case of individuals and partnerships, Debt Recovery Tribunal (“DRT”) shall act as the adjudicating authority and appeals therefrom shall lie with the Debt Recovery Appellate Tribunal (“DRAT”).

The Supreme Court of India shall have appellate jurisdiction over NCLAT and DRAT.

The IB Code governs two corporate insolvency processes, i.e. (i) insolvency resolution; and (ii) liquidation:

- i. *Insolvency resolution:* Upon a default by a corporate debtor, a creditor or the debtor itself may initiate insolvency resolution proceedings. The IB Code prescribes a timeline of 180 days for the insolvency resolution process, subject to a single extension of 90 days, during which there shall be a moratorium on the institution or continuation of suits against the debtor, or interference with its assets. During such period, the creditors and the debtor will be expected to negotiate and finalise a resolution plan, with the assistance of insolvency resolution professionals to be appointed by a committee of creditors formed for this purpose. Upon approval of such a plan by the adjudicating authority, the same shall become binding upon the creditors and the debtor.
- ii. *Liquidation:* In the event that no insolvency resolution is successfully formulated, or if the adjudicating authority so decides, a liquidation process may be initiated against the debtor. A liquidator is appointed, who takes the assets and properties of the debtor in his custody and verifies claims of creditors, selling such assets and properties and distributing the proceeds therefrom to creditors.

The bankruptcy of an individual can be initiated by the debtor, the creditors (either jointly or individually) or by any partner of a partnership firm (where the debtor is a firm), only after the failure of the Insolvency Resolution Process (IRP) or non-implementation of repayment plan. The bankruptcy trustee is responsible for administration of the estate of the bankrupt and for distribution of the proceeds on basis of the priority set out in the Code.

In addition, the IB Code establishes and provides for the functioning of the Insolvency and Bankruptcy Board of India (“IBBI”) which functions as the regulator for matters pertaining to insolvency and bankruptcy. The IBBI exercises a range of legislative, administrative and quasi-judicial functions, *inter alia*, in relation to the registration, regulation and monitoring of insolvency professional agencies, insolvency professionals and information utilities; publish information, data, research and studies as may be specified; constitute committees as may be required; and make regulations and guidelines in relation to insolvency and bankruptcy.

With recent notifications, IB Code covers NBFCs as well under the Corporate Insolvency Resolution Process. The creditors to NBFCs can approach the NCLT for insolvency resolution/ liquidation process against the NBFCs.

(b) Recovery of Debts due to Banks and Financial Institutions Act, 1993 (“Debts Recovery Act”)

The Debts Recovery Act provides for establishment of DRTs for expeditious adjudication and recovery of debts due to a bank or financial institution, or a consortium of banks or financial institutions. The Debts Recovery Act is only applicable to such debts as are for a sum that is greater than ₹1 million, or in the case of particular debts

that the Central Government may specify, greater than ₹0.1 million. A DRT established under the Debts Recovery Act exercises jurisdiction over applications from banks and financial institutions for the recovery of debts due to them, and no court or other authority can exercise jurisdiction in relation to matters covered by the Debts Recovery Act, except the higher courts in India in certain circumstances. The Debts Recovery Act also provides for the establishment of DRATs, and any appeal from any order of a DRT lies with a DRAT. Further, the Debts Recovery Act provides for the procedure to be followed in proceedings before a DRT or DRAT.

(c) *Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002* (“*Securitisation Act*”)

The Securitisation Act grants certain special rights to banks and financial institutions to enforce their security interests upon non-payment of a secured debt. The Securitisation Act provides that a secured creditor may, in the case of a default in payment of a debt or an instalment thereof, classify the account of the borrower as an NPA, and give notice in writing to the borrower requiring it to discharge its liabilities within 60 days, failing which the following rights accrue to the secured creditor:

- i. taking possession of the assets constituting the security for the loan, including the right to transfer the assets by way of lease, assignment or sale of the asset;
- ii. taking over the management of the business of the borrower, including the right to sell or otherwise dispose of the assets, in case a significant portion of the debtor’s business is held as security;
- iii. appointment of a manager to manage the secured assets; and
- iv. requiring that any person who has acquired any of the secured assets from the borrower and from whom any money is or may become due to the debtor, to pay the secured creditor instead.

Where a secured creditor seeks to take a secured asset into its possession or sell or transfer the same under the provisions of the Securitisation Act, the secured creditor may make a written request to the Chief Metropolitan Magistrate or the District Magistrate within whose jurisdiction the secured asset or relevant documents may be situated or found. Upon such request, the Chief Metropolitan Magistrate or District Magistrate may take possession of such assets and/or relevant documents and forward the same to the creditor, using or directing the use of such force as may be necessary. In addition, the secured creditor may file an application before a DRT or a competent court for recovery of balance amounts, if any, and may take any other measures for the recovery of debts.

Further, the Securitisation Act provides for the creation of a central database by the Central Government for recording rights over any property or creation, modification or satisfaction of any security interest thereon. This registry is to be integrated with registration records under various central registrations, including the Companies Act, 2013, the Registration Act, 1908 and the Motor Vehicles Act, 1988. Any registration of transactions for creation, modification or satisfaction of security interest by a creditor or filing of attachment orders shall be deemed to constitute a public notice. Where a security interest or attachment order upon property in favour of a creditor is filed for registration, the claim of such creditor has priority over any subsequent security interest, transfer or attachment order upon the property.

In addition, the Securitisation Act regulates ‘asset reconstruction companies’, which are companies intended to carry on the business of securitisation or asset reconstruction. An asset reconstruction company, upon being registered by the RBI, may acquire the financial assets of a bank or financial institution, whereupon it shall be deemed to become the lender in place of the bank in relation to such financial assets, and all rights of the bank or financial institution in relation to such financial assets shall vest in the asset reconstruction company. For the purposes of asset reconstruction, an asset reconstruction company may *inter alia* provide for the management of the business of a borrower (including a change in or takeover of its management), sale or lease of the business of a borrower, rescheduling payment of debts, settlement of dues, enforcement or possession of security interests, or conversion of debt of a borrower into shares.

Further, NBFCs shall exercise on-going due diligence with respect to the business relationship with every client and closely examine the transactions in order to ensure that they are consistent with their knowledge of the client, his business and risk profile and where necessary, the source of funds.

Subsequently, the Department of Industrial Policy & Promotion (“DIPP”) issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the “SOP”). The SOP provides a list of the competent authorities for granting approval for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under automatic route but which required Government approval earlier as per the extant policy during the relevant period, the administrative ministry/department concerned shall act as the competent authority (the “Competent Authority”) for the grant of *post facto* approval of foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP shall identify the Competent Authority. The DIPP has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendment to FEMA. In case of any conflict, FEMA prevails.

The Consolidated FDI Policy consolidates the policy framework in place as on August 27, 2017. Further, on January 4, 2018 the RBI released the Master Direction on Foreign Investment in India. Under the approval route, prior approval from the FIPB or RBI is required. FDI for the items/activities that cannot be brought in under the automatic route may be brought in through the approval route. Approvals are accorded on the recommendation of the FIPB, which is chaired by the Secretary, DIPP, with the Union Finance Secretary, Commerce Secretary and other key Secretaries of the Government of India as its members.

As per the sector specific guidelines of the Government of India, 100% FDI/ Non-Resident Indian (“NRI”) investments are allowed under the automatic route in certain NBFC activities subject to compliance with guidelines of the RBI in this regard.

(ii) External Commercial borrowing (ECB)

External Commercial Borrowings (“ECB”) are commercial loans raised by eligible resident entities from recognised non-resident entities. ECB transactions are governed by clause (d) of sub-section 3 of section 6 of FEMA, and by various regulations, notifications and RBI circulars, which have been consolidated in the RBI Master Direction on External Commercial Borrowings, Trade Credit, Borrowing and Lending in Foreign Currency by Authorised Dealers and Persons other than Authorised Dealers, dated January 1, 2016 and read in conjunction with RBI Circular dated January 16, 2019 (“ECB Master Direction” / “New ECB framework”). Under the above Master Direction and New ECB framework, a permitted resident may borrow from a recognised non-resident entity through bank loans; floating / fixed rate notes / bonds / (other than fully and compulsorily convertible instruments; trade credit beyond 3 years; FCCBs: FCEBs and financial Lease. Further plain Vanilla Rupee Denominated Bonds (RDBs) which can be placed privately or listed on exchanges as per host country regulations (only for INR denominated ECBs).

Borrowings through ECB may be raised through one of two options:

- (i) Foreign Currency denominated ECB
- (ii) INR denominated ECBs

Salient covenants of ECBs:

- (a) Minimum Average Maturity Period ("**MAMP**") of 3 years (manufacturing companies can raise up to US \$ 50 million with 1 year MAMP). If the ECB is raised from foreign equity holder and used for working capital, general corporate purposes or for repayment of Rupee loans will have MAMP of 5 years.
- (b) All-in-cost ceiling is Benchmark rate plus 450 bps. Prepayment charges / Penal interest shall not be more than 2% over and above contracted rate on the outstanding principal amount and will be outside the all-in-cost ceiling.

ECB may be raised by either automatic route or the approval route. Under the automatic route, ECB cases are examined by the Authorised Dealer Category-I, to whom the RBI has delegated the function of monitoring and approving ECB transactions. In borrowings through the approval route, the prospective borrowers are required to forward requests to the RBI through an authorised dealer. The ECB Master Directions prescribe individual limits of ECB that may be raised by an entity under the automatic route per Fiscal, beyond which, the ECB proposals of such entities shall come under the approval route. Accordingly, an AFC is permitted to raise up to USD 750 million or equivalent through the automatic route.

Electricity Sector Regulations:

Our Company also generates power from windmills and sells the same to Tamil Nadu Electricity Board and Gujarat UrjaVikas Nigam Limited. The following laws and regulatory requirements are applicable to our Company.

1. *The Ministry of New and Renewable Energy ("MNRE") regulations*

The MNRE is the Central Government ministry with the mandate for formulating schemes and policies for the research, development, commercialisation and deployment of renewable energy systems / devices for various applications in rural, urban, industrial and commercial sector. The MNRE has issued a number of guidelines and schemes on power generation through renewable sources, including a 'Special Programme on Small Wind Energy and Hybrid Systems'. In order to ensure quality of wind farm projects and equipments, the MNRE introduced the "Revised Guidelines for wind power projects" ("**MNRE Guidelines**") on June 13, 1996 for the benefit of state electricity boards, manufacturers, developers and end-users of energy to ensure proper and orderly growth of the wind power sector. The MNRE Guidelines are periodically updated and issued. The MNRE Guidelines among other things makes provision for proper planning, siting, selection of quality equipment, implementation and performance monitoring of wind power projects. The MNRE Guidelines lay down guidelines for the planned development and implementation of wind power projects.

The MNRE Guidelines set out the conditions that are required to be met for establishing wind farms and manufacturing and supplying equipment for wind power projects. These conditions include submission of detailed project reports, approval of sites for wind power installations, type certification by independent testing and certification agencies (either the Centre of Wind Energy Technology, Chennai or the International certification agency). Further, all installations are to be carried out only on sites that are approved for wind power projects by the MNRE. The MNRE Guidelines stipulate that a no objection certificate will be issued only after analysing the wind data to ensure adequate availability of wind at the specific site. Also, no approval will be granted for a wind power project which involves the installation of used wind turbines imported into India.

2. *The Indian Renewable Energy Development Agency Limited ("IREDA")*

The IREDA is a public limited government company under the administrative control of the MNRE and is engaged in encouraging the production of energy through renewable sources. In this respect, the IREDA offers financial support to specific projects and schemes for generating electricity, and promotes the energy conservation through by improving the efficiency of systems, processes and resources engaged in energy production and distribution. In particular, the IREDA offers scheme and incentives for the promotion of wind based energy production.

3. *Electricity Act, 2003*

Under the Electricity Act, 2003, which repealed all the earlier enactments pertaining to this sector, the activity of generation of wind power does not require any license or permission. Persons engaged in the generation of electricity from wind power are required to register the project being undertaken with State Nodal Agency and obtain permission

for inter-grid connectivity from the utility. The government has also announced National Electricity Policy in 2005 to guide the development of the electricity sector in India.

The electricity generated from the wind power project can be used for captive consumption, sale to utility or for transaction under open access as per the prevailing state policy as well as regulatory orders, if any. Various states have announced administrative policies relating to wheeling, banking and buy-back of power.

Further, the Electricity Act, 2003 also mandates that all regulatory commissions should procure certain percentage of power generation from renewable energy sources by all distribution companies. As far as the tariff and wheeling charges are concerned, it is stipulated that they should be decided by respective regulatory commissions as provided under the Electricity Regulatory Commissions Act, 1998.

4. *Electricity Regulatory Commissions*

Electricity Act, 2003 retains the two-level regulatory system for the power sector. At the Central Level, the Central Electricity Regulatory Commission (“**CERC**”) is responsible for regulating tariff of generating stations owned by the central government, or those involved in generating or supplying in more than one States, and regulating inter-state transmission of electricity. The State Electricity Regulatory Commissions (“**SERCs**”) on the other hand regulate intra-state transmission and supply of electricity within the jurisdiction of each state. CERC and the SERCs are guided by the National Electricity Policy, 2005, Tariff Policy, 2006 and the National Electricity Plan while discharging their functions under Electricity Act, 2003. The Electricity Regulatory Commissions are also guided by any direction given by the central government for CERC or the state government for the SERC pertaining to any policy involving public interest. The decision of the government is final and non-challengeable with respect to the question that whether directions pertain to policy involving public interest or not. The commissions have been entrusted with a variety of functions including determining tariff, granting licenses, settling disputes between the generating companies and the licensees. The Electricity Regulatory Commissions are a quasi-judicial authority with powers of a civil court and an appeal against the orders of the Commissions lie to the Appellate Tribunal.

The CERC has recently notified the CERC (Terms and Conditions for Recognition and Issuance of Renewable Energy Certificate for Renewable Energy Generation) Regulations on January, 14, 2010 for the promotion of power generation through renewable sources of energy. In this respect, these regulations contemplate two categories of certificates, solar and non-solar certificate. The CERC has designated the National Load Dispatch Center to issue registration certificates and undertakes to provide for the floor price (minimum) and forbearance price (maximum) for non-solar certificates.

Laws relating to intellectual property

ANNEXURE XIV

SUMMARY OF SIGNIFICANT DIFFERENCES BETWEEN INDIAN GAAP AND IND AS

Sr. No.	Particulars	Indian GAAP	Ind AS
1	Ind AS 1 - Presentation of Financial Statements		
		Other Comprehensive Income:	
		There is no concept of 'Other Comprehensive Income' under Indian-GAAP.	Ind AS 1 introduces the concept of Other Comprehensive Income ("OCI"). Other comprehensive income comprises items of income and expenses (including reclassification adjustments) and tax effect thereof that are not recognized in profit or loss as required or permitted by other Ind AS.
		Statement of Changes in Equity	
		Under Indian GAAP, the statement of changes in equity is not presented. Movements in share capital, retained earnings and other reserves are to be presented in the notes to the financial statement	Ind AS 1 requires the set of financial statement to include a statement of changes in equity to be shown as a separate statement includes reconciliation between opening and closing balance of each component of equity.
		Change in Accounting Policies	
		Indian GAAP requires changes in accounting policies to be presented in the financial statements on a prospective basis (unless transitional provisions, if any, of an accounting standard require otherwise) together with a disclosure of the impact of the same, if material. If a change in the accounting policy has no material effect on the financial statements for the current period, but is expected to have a material effect in the later periods, the same should be appropriately disclosed.	Ind AS requires retrospective application of changes in accounting policies by adjusting the opening balance of each affected component of equity for the earliest prior period presented and the other comparative amounts for each period presented as if the new accounting policy had always been applied, unless transitional provisions of an accounting standard require otherwise.
		Disclosure of Reclassification	
		Under Indian GAAP, there are no specific disclosure requirements with regard to reclassification of comparative amounts in its financial statements.	When an entity reclassifies comparative amounts, it shall disclose (including as at the beginning of the preceding period), the nature amount and reason for reclassification.
		Extraordinary items	
		Under Indian GAAP, extraordinary items are disclosed separately in the statement of profit and loss and are included in the determination of net profit or loss for the period. Items of income or expense to be disclosed as extraordinary should be distinct from the ordinary activities and are determined by the nature of the event or transaction in relation to the business ordinarily carried out by an entity.	Under Ind AS, presentation of any items of income or expense as extraordinary is prohibited.

2	Ind AS 7 - Statement of Cash Flows		
		Classification of Bank Overdraft	
		Under Indian GAAP, Bank Overdrafts are considered as financing activities	Ind AS 7 specifically states that the bank overdrafts which are repayable on demand form an integral part of an entity's cash management, bank overdrafts are included as a component of cash and cash equivalents.
3	Ind AS 8 – Accounting Policies, Changes in accounting estimates and Errors		
		Rectification of material prior period errors	
		Under Indian GAAP, prior period items are included in determination of net profit or loss of the period in which the error pertaining to a prior period is discovered and are separately disclosed in the statement of profit and loss of the period in which the error pertaining to a prior period is disclosed and are separately disclosed in the statement of profit and loss in a manner that the impact on current profit or loss can be perceived.	Ind AS 8 requires that the material prior period errors are corrected retrospectively by restating the comparative amounts for prior periods presented in which the error occurred or if the error occurred before the earliest period presented, by restating the opening statement of financial position.
4	Ind AS 12 – Income Tax		
		Approach for Measurement	
		Under Indian GAAP, the Company determines deferred tax to be recognized in the financial statements with reference to the income statement approach i.e. with reference to the timing differences between profit offered for income taxes and profit as per the financial statements	As per Ind AS 12 Income Taxes, deferred tax is determined with reference to the balance sheet approach i.e. based on the differences between carrying value of the assets/ liabilities and their respective tax base. Using the balance sheet approach, there could be additional deferred tax charge/income on account of all Ind AS opening balance sheet adjustments.
		Recognition	
		As per AS 22, The tax effects of timing differences are included in the tax expense in the statement of profit and loss and as deferred tax assets or as deferred tax liabilities, in the balance sheet.	As per Ind AS 12, for transactions and other events recognized in profit or loss, any related tax effects are also recognized in profit or loss. For transactions and other events recognized outside profit or loss (either in other comprehensive income or directly in equity), any related tax effects are also recognized outside profit or loss (either in other comprehensive income or directly in equity, respectively).
5	Ind AS 115 Revenue		
		Interest Income	
		Indian GAAP requires interest income to be recognized on a time proportionate basis taking into account the amount outstanding and the rate applicable.	As per Ind AS, interest income shall be recognized using the effective interest method as set out in Ind AS 39. Further it is clarified that it is necessary to distinguish between financial service fees that are integral part of the effective interest rate of a financial instrument, fees that are earned as services are provided, and fees that are earned on the execution of a significant act.

6	Ind AS 19 – Accounting for Employee Benefits	
	Recognition of Actuarial Gains and Losses:	
	Currently, under Indian GAAP the Company recognizes all short term and long-term employee benefits in the profit and loss account as the services are received. For long term employee benefit, the Company uses actuarial valuation to determine the liability.	Under Ind AS 19, the change in liability is split into changes arising out of service, interest cost and re-measurements and the change in asset is split between interest income and re-measurements. Changes due to service cost and net interest cost/income need to be recognized in the income statement and the changes arising out of re-measurements are to be recognized directly in OCI.
	Discounting of post-employment benefit obligations	
	As per Indian-GAAP the rate used to discount post-employment benefit obligations should always be determined by reference to market yields at the Balance sheet date on government bond.	As per Ind AS 19, the Company shall discount post-employment benefit obligations arising on account of post-employment benefit plans using the rate determined by reference to market yields at the end of the reporting period on high quality corporate bonds also.
7	Ind AS 24 Related parties	
	Indian GAAP the scope of related parties is limited.	Under Ind AS, the scope of related parties is extensive
8	Ind AS 32/109/107 - Presentation and classification of Financial Instruments and subsequent measurement	
	Recognition	
	Currently, under Indian GAAP, the financial assets and financial liabilities are recognized at the transaction value.	Ind AS 109 requires all financial assets and financial liabilities to be recognized on initial recognition at fair value.
	Classification	
	<p>The Company classifies all its financial assets and liabilities as short term or long term. Long term investments are carried at cost less any permanent diminution in the value of such investments determined on a specific identification basis.</p> <p>Current investments are carried at lower of cost and fair value.</p> <p>Financial liabilities are carried at their transaction values.</p>	<p>Financial assets have to be either classified as measured at amortized cost or measured at fair value.</p> <p>Where assets are measured at fair value, gains and losses are either recognized entirely in profit or loss, (FVTPL), or recognized in other comprehensive income (FVOCI). Financial assets include equity and debts investments, interest free deposits, loans, trade receivables etc. Assets classified at amortized cost and FVOCI and the related revenue (including interest subsidy, processing fees and fees of similar nature) net of related costs have to be measured using the Effective Interest Rate (EIR) method.</p>
	Measurement	
	Disclosures under Indian GAAP are limited. Currently under Indian GAAP, processing fees and/or fees of similar nature are recognized upfront in the Statement of Profit and Loss	<p>Loan processing fees, origination fee and/or fees of similar nature would be measured and recognized using the Effective Interest Rate (EIR) method over the period of loan (i.e., expected life of the financial instrument)</p> <p>There are two measurement categories for financial liabilities – FVTPL and amortized cost. Fair value adjustment on transition shall be adjusted against opening retained earnings on the date of transition.</p> <p>Origination fees are measured at amortized cost. An entity measures fees and costs that are an integral part of the effective interest rate for the financial liability from the</p>

		origination fees and transaction costs relating to the right to provide services, such as investment management services.
	Staff Loan	
	Staff loans are recognized at the transaction value and interest income on staff loan is recognized based on the agreed rate of interest of each loan.	<p>Staff advance is a financial asset and should be measured at fair value initially:</p> <p>Fair value of a loan given on normal commercial terms at inception will usually equal the loan amount. However, loan given on favorable terms, i.e. less than market rate, the fair value of such loan will be less than the loan amount. Fair value of such loans can be estimated as the present value of the future cash flows discounted at market rate for a similar loan.</p>
	De-Recognition	
	Currently, the de-recognition of financial assets under securitization/assignment transactions are governed by RBI guidelines for NBFCs.	Ind AS 109 prescribes transfer of risk and rewards of ownership for de-recognition of financial assets.
	Impairment	
	Under Indian GAAP, the Company assesses the provision for doubtful debts at each reporting period, which in practice, is based on relevant information like past experience, financial position of the debtor, cash flows of the debtor, guidelines issued by the regulator etc.	The impairment model in Ind AS is based on expected credit losses and it applies equally to debt instruments measured at amortized cost or FVOCI, lease receivables, contract assets within the scope of Ind AS 15 (currently deferred) and certain written loan commitments and financial guarantee contracts.
	Preference Shares	
	Financial instruments are classified based on legal form redeemable preference shares will be classified as equity. Preference dividends are always recognized similar to equity dividend and are never treated as interest expense.	Financial instruments are classified as a liability or equity according to the substance of the contractual arrangement, (and not its legal form), and the definition of financial liabilities and equity instruments. Dividends on financial instruments classified as financial liability is recognized as an interest expense in the statement of profit or loss and other comprehensive income. Hence if preference shares meet the definition of financial liability, the preference dividend shall be treated as an interest expense.
9	Ind AS 37 - Provisions, contingent liabilities and contingent assets	
	Under Indian GAAP, provisions are recognized only under a legal obligation. Also, discounting of provisions to present value is not permitted.	Under Ind AS, provisions are recognized for legal as well as constructive obligations. Ind AS requires discounting the provisions to present value, if the effect of time value of money is material.
	Contingent assets are neither recognized nor disclosed in the financial statements	Contingent assets are not recognized but disclosed in the financial statements when an inflow of economic benefits is probable.

Rationale

The ratings consider Sakthi Finance Limited's (SFL) experience in the retail financing business and its established franchise in Tamil Nadu and Kerala. The ratings also factor in the company's prudent origination, monitoring and collection systems, which have evolved over the last six decades of its operations and its reasonable asset quality, with the 90+ dpd moderating to 4.9% as of September 2019 from 5.8% as of September 2018. The ratings take cognisance of SFL's proposed capital raise of about Rs. 50 crore, which would improve the capitalisation from the current levels (gearing stood at 7.1 times as of September 2019).

The ratings are, however, constrained by SFL's geographically concentrated operations and the highly competitive business environment, which exerts pressure on the company's business growth and profitability (net profitability stood at 0.9% in H1 FY2020 [Ind-AS; provisional] vis-à-vis 0.8% [Ind-AS] in FY2019 and 1.0% [IGAAP] in FY2018). ICRA takes note of the company's ability to raise funds through the public issuance of debentures and retail deposits to support its overall liquidity profile as incremental funding from banks remains modest in relation to its requirements. Currently, the company envisages to raise about Rs. 150-200 crore through the public issuance of debentures in the near term. SFL's ability to raise funds via debentures via the public issuance route and from HNIs and others via private placements on a regular basis and secure the envisaged capital infusion in the near term would be critical for business growth.

ICRA has withdrawn the rating of [ICRA]BBB(Stable) for SFL's non-convertible debenture (NCD) programme, aggregating Rs. 113.92 crore, as these debentures were either fully redeemed or not placed, and no amount is outstanding against the withdrawn instruments.

Key rating drivers and their description

Credit strengths

Established franchise and presence in regional market – SFL has a track record of more than six decades in the vehicle finance segment, with operations across Tamil Nadu, Kerala, Andhra Pradesh and Karnataka. It has a good understanding of the target segments, mainly the used commercial vehicle (CV) segment, and has established customer relationships, with repeat customers accounting for about 55-60% of the incremental business.

Effective origination, monitoring and collection systems – SFL's extensive presence in vehicle finance along with the Sakthi Group's presence in related businesses like automotive dealerships has aided in effective origination, prudent appraisal, good market responsiveness, monitoring and collections. The company has a branch-centric operating model with an in-house origination team, which is responsible for collections, while the credit sanctions are centralised. SFL conducts credit bureau checks to screen its customers, followed by field investigation and income assessment and viability analysis as a part of its loan origination process. Prior to loan disbursement, the company's internal risk control unit verifies the authenticity of the documents submitted. SFL has implemented a workflow management system at 75% of its branches, which will enable the management to monitor the sourcing and collection activities on a real-time basis, thereby reducing the lead time for loan processing.

Reasonable asset quality; critical to contain credit cost – The 90+dpd improved to 4.9% in September 2019 from 5.8% in September 2018 (5.0% in March 2019). The 180+dpd also improved to 3.5% in September 2019 from 5.1% in September 2018 (3.9% in March 2019). However, there are slippages in the softer buckets, with the 30+dpd at 20.7% and the 60+dpd at 13.8% in September 2019 compared to 17.5% and 9.0%, respectively, in March 2019 (21.5% and 10.1%, respectively, in September 2018). The company's credit cost has remained at about 0.3-0.5% in the last four years with an average of 0.4%. The provision coverage on NPAs also improved to 47% in September 2019 from 37% in September 2018 (42% in March 2019). Going forward, it would be critical for SFL to undertake overall effective recoveries to keep the asset quality and credit costs under control.

Credit challenges

Subdued portfolio growth; regionally concentrated operations – SFL's portfolio grew by a modest 3.7% in FY2019 to Rs. 936 crore as on March 31, 2019 and a further 4.2% in H1 FY2020 to Rs. 975 crore as on September 30, 2019. The subdued portfolio growth was largely because of the high competitive pressure and the company's moderate financial flexibility. SFL has a regionally concentrated portfolio with Tamil Nadu and Kerala accounting for 95% of the total portfolio as of September 2019. ICRA expects the portfolio share to remain concentrated, given the company's limited branch expansion plans in the medium term.

Decline in profitability – SFL's net interest margin declined to 5.3% (Ind-AS) in H1 FY2020 from 5.7% in FY2019 (Ind-AS) and 5.8% (IGAAP) in FY2018 as it faced higher competition amid slowing demand. Its operating cost ratio declined to 3.9% in H1 FY2020 from 4.2% in FY2019 (4.1% in FY2018) while the credit cost was stable at about 0.4%. The company's net profitability declined to 0.8% in FY2019 and 0.9% in H1 FY2020 vis-à-vis 1.0% in FY2018. The profit before tax, as a proportion of total assets, stood at 1.6%, 1.3% and 1.2% in FY2018, FY2019 and H1 FY2020, respectively. SFL's ability to improve its operating efficiencies further and keep the credit costs under control would be critical for incremental profitability.

Increase in leverage; improvement expected post the planned capital raise – SFL has a moderate capitalisation profile with a gearing of 7.1 times as of September 2019 (6.3 times as of March 2019). The company did not go ahead with the planned rights issue in H1 FY2020, as was previously envisaged, though it is currently planning to raise Rs. 25 crore
www.icra.in

through a preferential placement in March 2020. The preferential issue would enable SFL to strengthen its capitalisation profile with the gearing, post issue, likely to moderate to around 6.0-6.5 times. The company plans to raise another round of capital of Rs. 25 crore in FY2021. It is expected to maintain its leverage at about 6.0-6.5 times going forward.

Diversification of funding profile critical to meet long-term growth plans – SFL has limited financial flexibility as continued weakness in Group entity performances limits its ability to secure incremental funding from some banks. ICRA, however, notes that in the recent past, SFL has increased its dependence on retail deposits and debentures largely via public issuances. Currently, the company envisages raising about Rs. 200 crore through the public issuance of debentures and about Rs. 70-80 crore (annually) via private placements to HNIs. Moreover, the proposed capital raise would bolster its ability to secure further retail deposits, which, as of December 2019, stood at 1.43 times its net owned funds. SFL would need to diversify its lender base to achieve its long-term growth plans and to maintain adequate liquidity.

Liquidity position: Adequate

SFL's asset-liability maturity (ALM) profile was well matched, as of December 2019, with no cumulative negative mismatches in the less-than-one-year buckets. ICRA takes note of the sizeable repayments (about Rs. 110 crore) in May 2020. While the ALM is well matched, the company is expected to steadily increase its on-balance sheet liquidity over the next few months on the back of its monthly collections (loans/advances) of about Rs. 30-35 crore. SFL had a cash and bank balance of about Rs. 35 crore and sanctioned undrawn bank lines of about Rs. 18 crore as of December 2019. ICRA notes that the planned NCD issuance in the near term would further uplift the liquidity profile and support business growth. The company's ability to raise resources in a timely manner and at competitive rates would be crucial going forward.

Rating sensitivities

Positive triggers – ICRA could change the outlook or upgrade the ratings if SFL augments its capital profile (gearing of around 6.0 times on a sustained basis) while steadily improving its funding, asset quality and earnings profiles.

Negative triggers – ICRA could change the outlook or downgrade the ratings of SFL in case of a significant weakening in the asset quality, which could adversely impact its earnings, or an increase in the gearing beyond 7.0 times on a sustained basis or a deterioration in the liquidity profile.
